Football and the pastoral conservative baseball turn out to be recognized as emblematic expressions of typical American values. As national pastimes they are more than distractible spectacles but inherit and re-enact parts of American national ideology. Militaristic and imperialistic undertones are often found in the corpus and these attitudes are critically and ironically reflected by literary authors. An examination of religious metaphors showed how mass media spectator sport has acquired a status of quasi religious myth making its values and belief systems intermixing with and superimposing on classic religious and national myths. Commercialization in sports and economic globalization is greeted with suspicion by both sports journalists and authors. Instead American professional sport turns out to be a spectacle built around folk heroes whose status and media representation shows how the American public cherishes individual success. As Apollonian and Dionysian heroes athletes succeed by embodying genius and creativity at the same time orderliness and conservatism.
