Workers and the Wild Lawrence M. Lipin,2007 In an innovative blend of environmental and labor history Workers and the Wild examines the changing terms on which battles over the proper use of nature were fought in the early twentieth century Focusing on Oregon in the 1910s and 1920s Lawrence M Lipin traces labor s shift in thinking about natural resources They began with the producerist idea that resources and land both rural and urban should be put to productive use and that those who do are most entitled to access to them They later shifted to a consumerist view under which resources should be available for public and recreational use While labor was initially resistant to the elitism of protected nature preserves working class views changed as automobiles became more affordable and gained increased access to national parks forests and beaches They subsequently accepted the preservation of nature for recreation and even began to pressure state agencies to provide more outdoor opportunities While fish and game commissioners responded with ever more intensive hatchery operations wildlife advocates began a push for designated wilderness areas In these and other ways the labor movement s shifting relationship to nature reveals the complicated development of wildlife policy and its own battles with consumerism
