**Sharing the Journey** David Yellin, 2017-05-12 This wonderful resource from two authors with an infectious enthusiasm for children's literature will help readers select and share quality books for and with young children. Specifically focused on infants through the third grade, *Sharing the Journey* contains descriptive book annotations, instructive commentary, and creative teaching activities tailored for those important years. Extensive book lists throughout will help readers build a library of quality children's literature. Books representing other cultures are included to help celebrate diversity as well as cultural connection. Genre chapters include poetry, fantasy, and realistic and historical fiction. A chapter on informational books demonstrates how young children can be introduced to and learn to enjoy nonfiction. Videos for Kids Doug Atkinson, Fiona Zippan, 1995 Not merely a one paragraph synopsis of the film, *Videos for Kids* includes a complete description of the action as well as warnings to Stop, Caution, and Go. The authors have viewed every film listed in the book for violent content questions that may arise from young viewers, themes, and more. Illustrations. **Storytimes for Two-Year-Olds** Judy Nichols, 2007 Provides fifty storytime programs for two-year-olds including ideas and suggestions for storytime content and encouragement to serve this age group. **Water Safety, Security and Sustainability** Ashok Vaseashta, Carmen Maftei, 2021-07-14 This book focuses on threats, especially contaminants to drinking water and the supply system, especially in municipalities but also in industrial and even residential settings. The safety, security, and suitability landscape can be described as dynamic and complex, stemming from necessity and hence culpability due to the emerging threats and risks vis-à-vis globalization resulting in new forms of contaminants being used due to new technologies. The book provides knowledge and guidance for engineers, scientists, designers, researchers, and students who are involved in water sustainability and study of security issues. This book starts out with basics of water usage, current statistics, and an overview of water resources. The book then introduces different scenarios of safety and security and areas that researchers need to focus on. Following that, the book presents different types of contaminants: inadvertent, intentional, or incidental. The next section presents different methodologies of contamination: sensing, detection, and remediation strategies as per guidance and standards set globally. The book then concludes with selected chapters on water management, including critical infrastructure that is critical to maintaining safe water supplies to cities and municipalities. Each chapter includes descriptive information for professionals in their respective fields. The breadth of chapters offers insights into how science, physical, natural, and social, and technology can support new developments to manage the complexity resident within the evolving threat and risk landscape. **Spot Goes Splash! and Other Stories** Eric Hill, 2000 America's favorite puppy is back in three stories bound into one book: *Spot Goes Splash*, *Spot at the Fair*, and *Sweet Dreams*.
