An understanding of light and shadow is crucial to many STEM fields including astronomy biology engineering architecture and more. This book shows teachers how to engage children ages 3-8 with light and shadow in a playful way building an early foundation for the later more complex study of this phenomena and ultimately for children's interest in professions within the STEM fields. The text offers guidance for arranging the physical environment of classrooms integrating literacy learning and investigations and building partnerships with administrators. Each volume in the STEM for Our Youngest Learners Series includes examples of educators and children engaging in inquiry learning.
