Naturally Curious Mary Holland,2018-04-01 Are you ready for a glimpse into the dark subterranean world of the star nosed mole A barred owl's late winter call to take on new meaning The life cycle of the eastern newt to suddenly seem

complex beautiful and intricately bound to mysterious underwater landscapes and damp forest floors Naturalist and environmental educator Mary Holland's visually astounding book *Naturally Curious* promises a walk in the woods or a field or wetland will never be the same. With boundless enthusiasm and a lifetime's worth of natural history knowledge Holland escorts you through the New England seasons month by month in sun rain and snow along roadsides and riverbanks above burrows and under treetop nesting sites. Beginning with March and its early stirrings of life awakening after a long cold winter and ending in February as survival becomes the sole focus of all plants and creatures great and small Holland provides hundreds of fascinating Nature Notes. These bite size nuggets of fact based information detail a species' actions in a particular month whether courting, breeding, singing, burrowing, migrating, or caching food for example. In addition you'll find pertinent lists of the amphibians, reptiles, birds, mammals, insects, and arachnids and plants and fungi you might expect to see or hear from as the weeks go by. But that's not all. Each month culminates in specially chosen essays where Holland gets up close and personal with New England plant and animal life and some of their more intriguing typicalities and peculiarities illustrating their impact on the region and those who share it. Throughout the many exciting and varied worlds of the Northeast explode upon the page in an unmatched visual display of full color photographs. From the minutiae the migration of the tiny snow flea on a warm winter's day to the massive the wallowing practices of the bull moose in rut this is the region and its inhabitants like you've never seen them before. By deftly melding the practical field guide we all need with the kind of book we all want to sit back and read, Holland does New England and those who live in it, visit it, and love it an immense service. Adults and children alike are sure to be fascinated by the natural world in this book in their backyard and even further afield. *Naturally Curious* is truly an *into this world* experience.

Vernon Ahmadjian, 1979 [The Pollinator Victory Garden](#) Kim Eierman, 2020-01-07 The passion and urgency that inspired WWI and WWII Victory Gardens is needed today to meet another threat to our food supply and our environment the steep decline of pollinators. The Pollinator Victory Garden offers practical solutions for winning the war against the demise of these essential animals. Pollinators are critical to our food supply and responsible for the pollination of the vast majority of all flowering plants on our planet. Pollinators include not just bees but many different types of animals including insects and mammals Beetles, bats, birds, butterflies, moths, flies, and wasps can be pollinators. But many pollinators are in trouble and the reality is that most of our landscapes have little to offer them. Our residential and commercial landscapes are filled with vast green pollinator deserts better known as lawns. These monotonous green expanses are ecological wastelands for bees and other pollinators. With The Pollinator Victory Garden you can give pollinators a fighting chance. Learn how to transition your landscape into a pollinator haven by creating a habitat that includes pollinator nutrition, larval host plants for butterflies and moths, and areas for egg laying, nesting, sheltering, overwintering, resting, and warming. Find a wealth of information to support pollinators while improving the environment around you. The importance of pollinators and the specific threats to their
