Effects of Priming and Work Relationship on Linguistic Alignment in Computer-mediated Communication and Human-computer Interaction Jiang Hu, 2011 People engaged in a conversation tend to express themselves in similar ways by using comparable or identical words phrases sentence structures accent speech rate etc This process and end results are termed linguistic alignment and have also been observed in both computer mediated communication CMC and human computer interaction HCI Many researchers have demonstrated that linguistic alignment can be easily induced through priming while others focus on the social aspect of linguistic alignment Moreover previous research work on linguistic alignment mostly focused on conversation within dyads In this dissertation I report two experimental studies that in the context of a triadic conference chat setting investigated the co presence of alignment as a result of priming and alignment attributable to difference in work relationship cooperation vs competition Similarities and differences observed in the HCI and CMC conditions were also examined Results show that priming is a strong predictor of alignment even when interlocutors do not directly communicate with each other but work relationship between interlocutors and communication type i e HCI vs CMC could also sway the degree of alignment Additionally the priming effect on certain stylistic dimensions e g vocabulary complexity lasted relatively longer than the effect on other features e g capitalization As a whole the dissertation proposes a holistic way of examining and understanding linguistic alignment and offers researchers a new methodology utilizing realistic user contexts and tasks to study human language behaviors in general and those specific to HCI and CMC

Assessment of the SIMITAR Gunnery Training Strategy Through Development of a Database of Gunnery Outcome Measures Monte D. Smith, 1998 This report assesses the impact of the Simulation in Training for Advanced Readiness SIMITAR compressed gunnery training strategy for Army National Guard ARNG armored and mechanized infantry units This strategy emphasizes the use of state of the art training aids devices simulators and simulations TADSS in response to challenges posed by time and range constraints experienced by ARNG combat units Assessment entailed development of a longitudinal database of gunnery related information generated before 1993 1994 and during 1995 1997 SIMITAR strategy implementation This information was collected from armored and mechanized infantry units from a SIMITAR test brigade and from six enhanced

no SIMITAR comparison brigades Overall the SIMITAR training strategy was successful Results showed that final crew level tank gunnery qualification on Table 8 did not differ either between the SIMITAR and comparison units or within the SIMITAR test unit across data collection years Bradley Fighting Vehicle Table 8 qualification rate however did favor the comparison units Perhaps more importantly the SIMITAR strategy permitted most 94% fully staffed SIMITAR platoons to complete gunnery Table 8 with a 45% overall qualification rate and enabled company and higher level maneuver training objectives to be accomplished all within a normal 39 day yearly training calendar Suggestions for research needed to extend SIMITAR training strategy benefits are provided DITC *Research Report* ,1998 PC Mag ,1995-03-28 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology **PC Mag** ,1990-01-30 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology **PC** ,1989 **InfoWorld** ,1986-09-01 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects *AMSTAT News* American Statistical Association,1998 **SPSS for Windows Tables, Release 5** SPSS Inc,1993-01-01 **Applied Discriminant Analysis** Carl J. Huberty,1994-08-11 Most books on discriminant analysis focus on statistical theory But properly applied discriminant analysis methods can be enormously useful in the interpretation of data This book is the first ever to offer a complete introduction to discriminant analysis that focuses on applications It provides numerous examples explained in great detail using current statistical discriminant analysis algorithms It also develops several themes that will be useful to researchers and students regardless of the analytical methods they employ They are the careful examination of data prior to final analysis the application of critical judgment and common sense to all analyses and interpretations and conducting multiple analyses as a matter of routine To encourage and enable readers to conduct multiple analyses of their data the accompanying diskette contains the four complete data sets and five special computer programs that are referred to repeatedly in the text and are the subjects of numerous exercise problems This enables the reader to carry out package analyses on the data sets using a variety of procedural options both within and across computer packages The term discriminant analysis means different things to different people For statisticians and researchers in the physical sciences it usually denotes the process through which group membership is predicted on the basis of multiple predictor variables Behavioral scientists on the other hand often use discriminant analysis to describe group differences across multiple response variables Though closely related predictive discriminant analysis PDA and descriptive discriminant analysis DDA are used for different purposes and should be approached in different ways To accentuate these differences and distinguish clearly between the two Applied Discriminant Analysis presents these topics separately For graduate students this book will

expand your background in multivariate data analysis methods and facilitate both the reading and the conducting of applied empirical research It will also be of great use to experienced researchers who wish to enhance or update their quantitative background and to methodologists who want to learn more about the details of applied discriminant data analysis and some still unresolved problems as well [InfoWorld](#) ,1989-08-14 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects **Paperbound**
