**Squaring Up** Mary Carolyn King, 2025-12-10

Despite three decades of progress, American women's incomes still average just over half of those of men. This income gap is both a cause and a symptom of gender inequity. The gap means that women are only half as able as men to support themselves and their families; are too often mired in poverty and have less power than men do in their families, communities and governments. In this book, economists present readable, informative and compelling assessments of several policy strategies capable of bringing down the barriers to economic equality for women and men. More specifically, *Squaring Up* discusses the potential of ten different strategies to raise women's incomes. These strategies fall into three categories: those intended to reduce the negative impact of childrearing on women's incomes; those designed to raise the wages in the jobs where most working women are concentrated; and those focused on moving women into better-paying positions. The chapters on each policy strategy represent both a state-of-the-art assessment of the potential of each strategy to raise American women's incomes and an introduction to the topic that includes information on current programs and directs the reader to the most important literature on the topic. The policies considered constitute a pluralist agenda for women: one that can be supported by people across the American political spectrum as it calls for support for stay-at-home mothers, poor women, women in stereotypical women's jobs, women in non-traditional employment, high-powered women executives and older women. This book features contributions from many of the best economists working on issues of relevance to women today, including Nancy Folbre, recent recipient of a MacArthur genius fellowship, and Barbara Bergmann, previous president of the International Association for Feminist Economics and author of *The Economic Emergence of Women*. *Squaring Up* is designed for courses in a wide range of disciplines, including public policy, political science, economics, sociology and women's studies. It is also intended for policy makers, opinion leaders, activists and the general public interested in women's issues.

**Cashing in on Pay Equity?** Jan Kainer, 2002

Annotation: Pay equity has been on the political agenda of the women's movement in Canada for at least twenty-five years. In that time, political action by women and the labour movement has culminated in pay equity laws in six of ten Canadian provinces. Despite this, a gender wage gap continues to exist. Why hasn't pay equity law resulted in better pay for women? Why does the gender wage gap continue to exist? Is pay equity law an effective tool for eliminating workplace practices that contribute to gender wage inequality? *Cashing In On Pay Equity* explores these questions through an in-depth study of pay equity implementation in Ontario's supermarket chains during the 1990s, a period of workforce reorganization for the retail food sector. Despite union representation and pay equity legislation that had the potential to deliver gender wage fairness, gender wage inequities remained following the pay equity exercise. Intense industry

competition economic restructuring and business unionism worked to prevent a more favourable pay equity outcome  
Nonetheless Cashing In On Pay Equity argues that pay equity legislation has the flexibility to win economic justice for women
