Wood, Cristy Coughlin, Caitlin Rasplica Khoury, 2020-07-09 Based on more than ten years of research All Students Can Succeed presents a comprehensive review of research related to Direct Instruction DI a highly structured method of teaching based on the assumption that all students can learn if given appropriate instruction The authors identify over 500 research reports published over the last 50 years and encompassing almost 4 000 effect sizes no doubt the largest meta analysis of any single method of instruction ever published Extensive statistical analyses show that estimates of DI s effectiveness are consistent over time with different research approaches across different school environments students from all types of backgrounds different comparative programs and both academic achievement and non academic outcomes including student self confidence Effects are substantially stronger than those reported for other curricula When students have DI for more time and when teachers implement the programs as designed the effects are even stronger Results indicate that DI has the potential to dramatically change patterns of student achievement in the United States In an even handed style accessible to policy makers educators and parents the authors describe the theory underlying DI its development use and history systematically examine criticisms and discuss policy implications Extensive appendices provide detailed information for researchers

Moving Critical Literacies Forward Jessica Pandya, JuliAnna Ávila, 2013-11-26 Taking the pulse of current efforts to do and in some cases undo critical literacy this volume explores and critiques its implementation in learning contexts around the globe An impressive set of international authors offer examples of productive critical literacy practices in and out of schools address the tensions and gaps between these practices and educational policies and attempt to forecast the future for critical literacy as a movement in the changing global educational policy landscape This collection is unique in presenting the recent work of luminaries such as Allan Luke and Hilary Janks alongside relative newcomers who use innovative approaches and arguments to reinvigorate and redefine critical practice It is time for this cutting edge inquiry into the state of critical literacy not only because is it a complex and ever evolving field but perhaps more important because it offers a reaction to and powerful reworking of standardization and high stakes accountability measures in educational contexts around the globe
