Synthesis And Intentional Objectivity On Kant And Husserl:

Synthesis and Intentional Objectivity Nathan Rotenstreich, 2013-04-17 We shall be concerned in the following pages with some issues common to the systems of both Kant and Husserl. Given the structured nature of philosophical systems, however, the topics cannot be isolated from the systems in which they function, imbuing them in each case with a specific direction. An examination of the basic concept of *Anschauung* will indicate the difference between the two systems. To be sure, *Anschauung* points in both to the visual aspect of knowledge, an element inherent in the classical concept of *theoria*, which is related to the word *horao* to see. In Kant, however, the visual aspect is not the highest component of cognition, since it is related to sensuality. *Anschauung* belongs to the synthesis and not the summit of knowledge. It is given before thinking and is present in the ongoing search for relations between data. In Kant's understanding, pure reason can be related to data only through the medium of understanding. In this sense, we could say that *Anschauung*, being a variation of *Schau*, is that which can be perceived with the eyes. In Kant's system, it points to the presence of that which is given and thus to reception, whereas knowledge proper is a synthesis of reception and spontaneity. Spatio-temporal Intertwining Michela Summa, 2014-07-22

This volume explores Husserl's theory of sensibility and his conceptualization of spatial and temporal constitution. The author maps the linkages between Husserl's transcendental aesthetic, the theory of pure experience in *empirio-criticism*, as well as Immanuel Kant's transcendental philosophy. The core argument in this analysis centers on the relationship between spatiality and temporality in Husserl's philosophy. The study interrogates Husserl's understanding of the relationship between spatiality and temporality in terms of stratifications, analogies, and parallelisms. It incorporates a discussion of the potentialities and limitations of such an understanding. It concludes that such limits can be overcome by adopting an understanding of spatiality and temporality as interwoven moments of sensible experience, a spatio-temporal intertwining. This intertwining is made explicit in a thorough inquiry into three central topics in the phenomenological analysis of sensible experience: spatio-temporal individuation, perspectival givenness, and bodily experience. The book shows how such an inquiry can form the bedrock of a dynamic and relational understanding of experience as a whole. **The Porosity of the Self**

Laura Jane Nanni, 2024-12-30 *The Porosity of the Self* provides an original interpretation and comprehensive examination of the philosophy of Edmund Husserl (1859-1938), the founder of phenomenology and one of the most important and influential philosophers of the 19th-20th century. The book is unique in providing an exploration of the philosophical problem of the self, drawn from key texts across Husserl's work. The book challenges prevailing philosophical accounts of self and personhood that are predominantly one-dimensional and that often fail to capture the intricate double-sidedness of how we experience ourselves, others, and the world. The book demonstrates how Husserl's philosophy offers an important alternative account of the self as porous. The notion of the porosity of the self emerges through a thematic reconstruction of Husserl that emphasizes elements such as embodiment, habituality, temporality, personhood, intersubjectivity, and sociality. Here, the case is

made that the self should be understood as multidimensional dynamic and complex by highlighting its fundamentally permeable nature The main argument of the book is that no one element of the self is experienceable in isolation and that Husserl's understanding can equally accommodate the uniqueness of subjective experience as well as social cultural and historical in actions without yielding constitutive priority to one dimension over the other This book is unique as it strives to encourage broad engagement with Husserl's work by simplifying some of his more complex texts using clear and accessible language It shows how Husserlian phenomenology can provide a rich supplementary perspective for fields such as critical phenomenology and feminist philosophy and offers a renewed way of engaging with Husserl's philosophy

Postfoundational Phenomenology James Richard Mensch, 2010-11-01 A study of Edmund Husserl's philosophy as a non foundational approach to understanding the self as an embodied presence It demonstrates how Husserl anticipating the investigations of Merleau Ponty explored how the body functions to determine our self presence freedom and sense of time

Kant-Studien Hans Vaihinger, Max Scheler, Bruno Bauch, Max Frischeisen-Köhler, Arthur Liebert, Paul Menzer, 2000 1904 26 includes lists of members **Brinkman's cumulatieve catalogus van boeken**, 1999 Voorts een alphabetische lijst van Nederlandsche boeken in België uitgegeven Phenomenology and the Norms of Perception Maxime Doyon, 2024-06-26 In the philosophical literature it is customary to think of perception as being assessable with respect to epistemic norms E.g. the whole discussion around disjunctivism which is now often considered to be the dominant if not the default position in philosophy of perception is by and large framed and motivated by epistemological concerns about truth and falsity This book argues that perception is normative in another more fundamental sense Perception is governed by norms that Doyon calls perceptual that is immanent to its own structure This does not mean that perceptual norms are cut off from external facts it rather means that they are constitutive moments of our experience of these facts Perceptual norms are in that sense constitutive or enabling norms in that they establish what perception is To articulate this view he draws in the repertoire of the phenomenological tradition in the work of Edmund Husserl and Maurice Merleau Ponty in particular Like Kant both phenomenologists were concerned with the question of the unity of experience and sought to identify the conditions of possibility for having a perception which they conceive not as a mere sensible experience of the outer world but as a continuous and meaningful experience of reality Unlike Kant however neither phenomenologist immediately identified these conditions with cognition or epistemic criteria For both phenomenologists perception has its own standards its own conditions of possibility Perception obtains when it unfolds concordantly or coherently and when the perceptual progression corresponds to or is in harmony with one's goal or interest perception can also be said to be optimal From the phenomenological point of view concordance *Einstimmigkeit* and optimality *Optimalität* are the two basic perceptual norms governing over perceptual experience and much of the book is devoted to clarifying their meaning and to address the philosophical consequences that follow from this insight *The Review of Metaphysics*, 1999 **The Genesis of Hans**

Synthesis and Intentional Objectivity Nathan Rotenstreich, 2014-01-15

The Problem of Genesis in Husserl's Philosophy Jacques Derrida, 2011-04-15 Derrida's first book length work *The Problem of Genesis in Husserl's Philosophy* was originally written as a dissertation for his diploma studies supervised by Jean Beaufret in 1953 and 1954. Surveying Husserl's major works on phenomenology, Derrida reveals what he sees as an internal tension in Husserl's central notion of genesis and gives us our first glimpse into the concerns and frustrations that would later lead Derrida to abandon phenomenology and develop his now famous method of deconstruction. For Derrida, the problem of genesis in Husserl's philosophy is that both temporality and meaning must be generated by prior acts of the transcendental subject, but transcendental subjectivity must itself be constituted by an act of genesis. Hence the notion of genesis in the phenomenological sense underlies both temporality and atemporality, history and philosophy, resulting in a tension that Derrida sees as ultimately unresolvable yet central to the practice of phenomenology. Ten years later, Derrida moved away from phenomenology entirely, arguing in his introduction to Husserl's posthumously published *Origin of Geometry and its Philosophy* that the phenomenological project has neither resolved this tension nor expressly worked with it. *The Problem of Genesis in Husserl's Philosophy* complements these other works, showing the development of Derrida's approach to phenomenology as well as documenting the state of phenomenological thought in France during a particularly fertile period when Levinas, Sartre, Merleau-Ponty, Ricoeur, and Tran Duc Thao, as well as Derrida, were all working through it. But the book is most important in allowing us to follow Derrida's own development as a philosopher by tracing the roots of his later work in deconstruction to these early critical reflections on Husserl's phenomenology. A dissertation is not merely a prerequisite for an academic job; it may set the stage for a scholar's life project. So the doctoral dissertations of Max Weber and Jacques Derrida, never before available in English, may be of more than passing interest. In June, the University of Chicago Press will publish Mr. Derrida's dissertation *The Problem of Genesis in Husserl's Philosophy*, which the French philosopher wrote in 1953-54 as a doctoral student and which did not appear in French until 1990. From the start, Mr. Derrida displayed his inventive linguistic style and flouting of convention. *Danny Postel Chronicle of Higher Education*
