Systematic Hydrology J. C. Rodda, Richard Allen Downing, Frank M. Law, 1976 *Deterministic Methods in Systems Hydrology* James C.I. Dooge, Philip O'Kane, 2017-07-12 Deterministic Methods in Systems Hydrology presents the basic theory underlying the multitude of parameter rich models which dominate the hydrological literature. Its objectives are to introduce the elements of systems science as applied to hydrological problems to present flood prediction and flood routing as problems in linear systems theory clarifying the basic assumptions and evaluating their accuracy and to review and to evaluate some deterministic models of components of the hydrological cycle with a view to assembling the most appropriate model of catchment response for a particular problem in applied hydrology. The material is developed in two parts the first four chapters present the systems viewpoint the nature of hydrological systems some systems mathematics and their application to direct storm runoff. The final four chapters cover linear conceptual models of direct runoff the fitting of conceptual models to data simple models of subsurface flow and non linear deterministic models Handbook of Hydrology David R. Maidment, 1993-02-22 Introducing Hydrology's New Benchmark Reference. Here's the first book in nearly 30 years to provide comprehensive coverage of the current state of hydrologic knowledge and practice saving you hours of time tracking down the latest techniques in professional journals. Maidment's Handbook of Hydrology includes the contributions of more than 50 international authorities who provide you with practical methods of solving problems in every aspect of the field including the increasing application of geostatistics and computer models. You'll discover more effective ways to mitigate the impact of floods through better urban drainage assess the water supplies of cities and farming areas prevent the pollution of natural waters halt the damaging effects of erosion protect wildlife and preserve wetlands contain and remove contaminants in waterways and much more *International Workshop on Systems Analysis of Problems in Irrigation Drainage and Flood Control, 14-28 November, 1981*, 1981 Hydrology Papers Colorado State University, 1977
