Tadellaser Und Wolff:

Archives, Documentation, and Institutions of Social Memory Francis Xavier Blouin, William G. Rosenberg, 2007-08-02
Essays exploring the importance of archives as artifacts of culture Memories and Representations of War , 2009-01-01
The contributors to the present volume approach World War I and World War II as complex and intertwined crossroads leading to the definition of the new European and world reality and deeply pervading the making of the twentieth century. These scholars belong to different yet complementary areas of research: history, literature, cinema, art history; they come from various national realities and discuss questions related to Italy, Britain, Germany, Poland, Spain, at times introducing a comparison between European and North American memories of the two World War experiences. These scholars are all guided by the same principle: to encourage the establishment of an interdisciplinary and trans-national dialogue in order to work out new approaches capable of integrating and acknowledging different or even opposing ways to perceive and interpret the same historical phenomenon. While assessing the way the memories of the two World Wars have been readjusted each time in relation to the evolving international historical setting and through various mediators of memory (cinema, literature, art, and monuments), the various essays contribute to unveil a cultural panorama inhabited by contrasting memories and by divided memories, not to emphasise divisions but to acknowledge the ethical need for a truly shared act of reconciliation.

Trust and Violence Jan Philipp Reemtsma, 2012-04-22 A philosophical investigation into the connections between trust and violence. The limiting of violence through state powers is one of the central projects of the modern age. Why then have recent centuries been so bloody? In *Trust and Violence*, acclaimed German intellectual and public figure Jan Philipp Reemtsma demonstrates that the aim of decreasing and deterring violence has gone hand in hand with the misleading idea that violence is abnormal and beyond comprehension. We would be far better off, Reemtsma argues, if we acknowledged the disturbing fact that violence is normal. At the same time, Reemtsma contends that violence cannot be fully understood without delving into the concept of trust. Not in violence but in trust rests the foundation of true power. Reemtsma makes his case with a wide-ranging history of ideas about violence from ancient philosophy through Shakespeare and Schiller to Michel Foucault and by considering specific cases of extreme violence from medieval torture to the Holocaust and beyond. In the midst of this gloomy account of human tendencies, Reemtsma shrewdly observes that even dictators have to sleep at night and cannot rely on violence alone to ensure their safety. These authoritarian leaders must trust others while, by means other than violence, they must convince others to trust them. The history of violence is therefore a history of the peculiar relationship between violence and trust and a recognition of trust's crucial place in humanity. A broad and insightful book that touches on philosophy, sociology, and political theory, *Trust and Violence* sheds new and at times disquieting light on two integral aspects of our society.
