Sputnik Challenge:

The ^ASputnik Challenge Robert A. Divine, 1993-03-25 On October 4 1957 the Soviet Union launched a 184 pound metal ball called Sputnik into orbit around the Earth and America plummeted into a panic Nuclear weapon designer Edward Teller claimed that the United States had lost a battle more important and greater than Pearl Harbor and magazine articles appeared with such headlines as Are We Americans Going Soft In the White House President Eisenhower seemed to do nothing leading Kennedy in 1960 to proclaim a missile gap in the Soviet s favor Rarely has public perception been so dramatically at odds with reality In *The Sputnik Challenge* Robert Divine provides a fascinating look at Eisenhower s handling of the early space race a story of public uproar secret U 2 flights bungled missile tests the first spy satellite political maneuvering and scientific triumph He recreates the national hysteria over the first two Sputnik launches illustrating the anxious handwringing that the Democrats led by Senate Majority Leader Lyndon Johnson aggressively played for political gain Divine takes us to private White House meetings showing how Eisenhower worked closely with science adviser James Killian allowing him to take the lead in creating a civilian agency NASA which provided intelligent and forceful leadership for American space programs But the President also knew from priceless intelligence from U 2 flights over the U S S R that he had little to fear from the touted missile gap and he fought to limit the growth and multiplication of military missile programs Eisenhower s assurance however rested on classified information and he did little to instill his confidence in the public Nor could he boast of his early support for the secret spy satellite program which quickly replaced the U 2 plane after Gary Powers was shot down in 1960 So the public continued to worry feeding the national movement for educational reform as well as congressional maneuvering over funding for numerous strategic projects Eisenhower Divine writes possessed keen strategic vision and a sure sense of budgetary priorities but ultimately he flunked a crucial test of leadership when he failed to reassure the frightened public that their fears were groundless As a result he ultimately failed in his goal to limit military spending as well which led to a real missile gap in reverse Incisively written and deeply researched *The Sputnik Challenge* provides a briskly paced history of the origins of NASA the space race and the age of the ICBM **Total Cold War** Kenneth Alan Osgood, 2006 Osgood focuses on major campaigns such as Atoms for Peace People to People and cultural exchange programs Drawing on recently declassified documents that record U S psychological operations in some three dozen countries he tells how U S propaganda agencies presented everyday life in America to the world its citizens living full happy lives in a classless society where economic bounty was shared by all Osgood further investigates the ways in which superpower disarmament negotiations were used as propaganda maneuvers in the battle for international public opinion He also reexamines the early years of the space race focusing especially on the challenge to American propagandists posed by the Soviet launch of Sputnik *America's Space Sentinels* Jeffrey Richelson, 1999 During much of the Cold War America s first line of defense was in outer space a network of secret satellites that could provide instant warning of an enemy missile

launch The presence of these infrared sensors orbiting 22 000 miles above the earth discouraged a Soviet first strike and stabilized international relations between the superpowers and they now play a crucial role in monitoring the missile programs of China India and other emerging nuclear powers Jeffrey Richelson has written the first comprehensive history of this vital program tracing its evolution from the late 1950s to the present He puts Defense Support Program operations in the context of world events from Russian missile programs to the Gulf War and explains how DSP s infrared sensors are used to detect meteorites monitor forest fires and even gather industrial intelligence by seeing the lights of steel mills *The Professoriate: Challenges and Promises* Paul V. Bredson, Jay Paredes Scribner, 1998-04-28 The 1995 NCPEA Yearbook is organized into five major sections The first The Landscapes of Change Challenges for Professors of Educational Administration contains four chapters that frame the major themes and issues of the 1994 conference In Section 2 Educational Leadership and Development Program Theoretical Perspectives the authors explore theoretical lenses for examining the preparation of educational leaders and the development of educational administration programs Section 3 Responding to New Realities Program Development in Educational Administration contains detailed descriptions of emerging educational realities that have begun to trigger program changes and innovations in departments of educational leadership at six institutions Rethinking and Revisioning Teaching and Learning to prepared Educational Leaders Section 4 offers five excellent vignettes of changes and challenges for professors in creating new teaching and learning environments for themselves and their students In the final section Policies Programs and Practices Investigations in Educational Administration six chapters relate the finds of researchers using very different research designs and methods The implications for professors of educational administration and for all educational stakeholders are discussed **Crucified on a Cross of Atoms** Benjamin Patrick Greene, 2004 Into the Final Frontier Bernard McNamara, 2001 One of the greatest accomplishments of the 20th century was man s advance into space This book traces the development of manned space flight from the late 1800 s to the present time and offers speculation about man s future objectives in space The book discusses the scientific results of manned space flight while also examining the cultural military and political factors that influenced these achievements INTO THE FINAL FRONTIER is designed to work as a supplement to a main astronomy course or in a course specifically targeting the space program **Collecting Nature** Andrew G. Kirk, 2001 Finds in the history of Denver s Conservation Library a microcosm of the growth of the environmental movement as a whole *See Government Grow* Gareth Davies, 2007 An award winning historian s pathbreaking book uses federal education policy from the Great Society to Reagan s New Morning to demonstrate how innovative policies become entrenched irrespective of who occupies the White House Retracing the Journey Leila Christenbury, 2007 Leila Christenbury is well known as a writer and researcher in English education In her new book this veteran teacher and teacher educator reveals what did and more surprisingly did not happen when she returned to the high school classroom after a hiatus of many years Exploring her experiences in light of

current teacher preparation reform efforts the author's compelling narrative is a continuation of her earlier work that will resonate with those concerned with the state of secondary education in the United States today *The Communications Satellite Act of 1962* William Eyre Lee, 1977 **Men from Earth** Buzz Aldrin, Malcolm McConnell, 1989 Picking up where *The Right Stuff* left off and commemorating the 20th anniversary of Apollo 11 and the historic moon walk here is not only the incredible personal story of one of America's premier astronauts but the whole story of the spirit and challenge of the Apollo Space Program 16 pages of photos **Constructing America at the Peripheries** James A. Spiller, 1999 **Encyclopedia of American Foreign Policy**, 2002 Provides in depth interpretive essays commissioned from foreign policy experts explaining the concepts and historical trends that have guided and influenced American foreign policy throughout U S history

Contextualizing Teaching Joe L. Kincheloe, Patrick Slattery, Shirley R. Steinberg, 2000 Designed for the Foundations of Education course this book takes a postmodern approach to the material Show introduction to professor *American Foreign Policy* Daniel S. Papp, Loch K. Johnson, John E. Endicott, 2005 American Foreign Policy in a New Era utilizes the three major approaches to foreign policy analysis giving students an opportunity to obtain a comprehensive 360 degree understanding of U S foreign policy Students will use the methodologies of history and diplomatic history to develop an understanding of past U S foreign policy and how the United States became what it is today in global affairs employ a variety of social science methodologies used to explore the forces that shape and influence U S foreign policy and they will engage in policy analysis to study in depth five issues areas in contemporary U S foreign policy *Fortune* Henry R. Luce, 1957 *Quest*, 2006 **A Troubled Feast** William Edward Leuchtenburg, 1983 *LBJ* Randall Bennett Woods, 2006-08 For almost forty years the verdict on Lyndon Johnson's presidency has been reduced to a handful of harsh words tragedy betrayal lost opportunity Initially historians focused on the Vietnam War and how that conflict derailed liberalism tarnished the nation's reputation wasted lives and eventually even led to Watergate More recently Johnson has been excoriated in more personal terms as a player of political hardball as the product of machine style corruption as an opportunist as a cruel husband and boss In *LBJ* Randall B Woods a distinguished historian of twentieth century America and a son of Texas offers a wholesale reappraisal and sweeping authoritative account of the LBJ who has been lost under this baleful gaze Woods understands the political landscape of the American South and the differences between personal failings and political principles Thanks to the release of thousands of hours of LBJ's White House tapes along with the declassification of tens of thousands of documents and interviews with key aides Woods's LBJ brings crucial new evidence to bear on many key aspects of the man and the politician As private conversations reveal Johnson intentionally exaggerated his stereotype in many interviews for reasons of both tactics and contempt It is time to set the record straight Woods's Johnson is a flawed but deeply sympathetic character He was born into a family with a liberal Texas tradition of public service and a strong belief in the public good He worked tirelessly but not just for the sake of ambition His approach to reform at home and to fighting fascism and communism

abroad was motivated by the same ideals and based on a liberal Christian tradition that is often forgotten today Vietnam turned into a tragedy but it was part and parcel of Johnson's commitment to civil rights and antipoverty reforms LBJ offers a fascinating new history of the political upheavals of the 1960s and a new way to understand the last great burst of liberalism in America Johnson was a magnetic character and his life was filled with fascinating stories and scenes Through insights gained from interviews with his longtime secretary his Secret Service detail and his closest aides and confidants Woods brings Johnson before us in vivid and unforgettable color *THE HISTORIAN*, 1994
