Skyrn, 2014-09-16 Ever since the earliest days of commerce business people have organized themselves into partnerships They formed groups with a common interest and worked together as a single unit assuming both the risks and rewards of the business It was a natural way of achieving a common goal If the business succeeded all of the partners made money If it flourished the partners even sometimes became rich However success wasn t assured and if the business failed they all suffered together In addition to a multitude of other industries this was the model that dominated how Wall Street firms operated up until the 1980 s Beginning in the 1980 s it was not uncommon to find that a freshly hired trainee a kid literally right out of college knew more about the new financial instruments than the CEO of the firm that hired him In some instances the kids were learning about the finer points of newly invented instruments before their managers knew they even existed These were the new breed of traders scattered across the trading desks The individuals whose stories compose the contents of this book are some of the smartest people you ll ever read about They had an intimate understanding of the markets and how best to make money from them but they also had an equally in depth knowledge of some of the flaws in the markets Or sometimes flaws in the systems at the banks themselves They used their knowledge to make money And when that failed they often used their knowledge of how the system was structured to hide their losses And when that failed there was no turning back **Sessional Papers** Great Britain.
