For educators in the field of mathematics **Technometrics**, 1990 Resources in Education, 1984 Creating More Effective Graphs

Naomi B. Robbins, 2005 A succinct and highly readable guide to creating effective graphs. The right graph can be a powerful tool for communicating information improving a presentation or conveying your point in print. If your professional endeavors call for you to present data graphically here's a book that can help you do it more effectively. *Creating More Effective Graphs* gives you the basic knowledge and techniques required to choose and create appropriate graphs for a broad range of applications. Using real world examples everyone can relate to the author draws on her years of experience in graphical data analysis and presentation to highlight some of today's most effective methods. In clear concise language the author answers such common questions as What constitutes an effective graph for communicating data. How do I choose the type of graph that is best for my data. How do I recognize a misleading graph. Why do some graphs have logarithmic scales. In no time you'll graduate from bar graphs and pie charts to graphs that illuminate data like Dot plots Box plots Scatterplots Linked micromaps Trellis displays Mosaic plots Month plots Scatterplot matrices most of them requiring only inexpensive easily downloadable software. Whether you're a novice at graphing or already use graphs in your work but want to improve them *Creating More Effective Graphs* will help you develop the kind of clear accurate and well designed graphs that will allow your data to be understood.
