The Maidens Song:

Paths of Song Rosa Andújar, Thomas R. P. Coward, Theodora A. Hadjimichael, 2018-02-05 Paths of Song The Lyric Dimension of Greek Tragedy analyzes the multiple and varied evocations of choral lyric in fifth century Greek tragedy using a variety of methodological approaches that illustrate the myriad forms through which lyric is present and can be presented in tragedy. This collection focuses on different types of interaction of Greek tragedy with lyric poetry in fifth century Athens generic, mythological, cultural, musical and performative. The collected essays demonstrate the dynamic and nuanced relationship between lyric poetry and tragedy within the larger frame of Athenian song and performance culture and reveal a vibrant and symbiotic co-existence between tragedy and lyric. Paths of Song illustrates the effects that this dynamic engagement with lyric possibly had on tragic performances including performances of satyr drama as well as on processes of survival and reputation selection and refiguration tradition and innovation. The volume is of particular interest to scholars in the field of classics, cultural studies and the performing arts as well as to readers interested in poetic transmission and in cultural evolution in antiquity.

Medieval Woman's Song Anne L. Klinck, Ann Marie Rasmussen, 2015-08-06 The number of surviving medieval secular poems attributed to named female authors is small, some of the best known being those of the trobairitz, the female troubadours of southern France. However, there is a large body of poetry that constructs a particular textual femininity through the use of the female voice. Some of these poems are by men and a few by women, including the trobairitz; many are anonymous and often the gender of the poet is unresolvable. A woman's song in this sense can be defined as a female voice poem on the subject of love, typically characterized by simple language, sexual candor and apparent artlessness. The chapters in Medieval Woman's Song bring together scholars in a range of disciplines to examine how both men and women contributed to this art form. Without eschewing consideration of authorship, the collection deliberately overturns the long standing scholarly practice of treating as separate and distinct entities female voice lyrics composed by men and those composed by women. What is at stake here is less the voice of women themselves than its cultural and generic construction.

Combining in a unique way a sensual and deeply lyrical celebration of love with a well-established tradition of Christian allegorical interpretation this text, crucial to both the Middle Ages and the early modern period, held a particular appeal for poets devoted not only to religious verse but also to love.
