The Manacle:

The Iconography of Humiliation in New Kingdom Egypt Mark D. Janzen, 2024-11-26 This volume analyzes the iconography of bound foreigners on New Kingdom monuments and artifacts to better understand Egyptian perspectives on foreigners and their treatment of prisoners of war. Depictions of foreign captives in humiliating or torturous poses are ubiquitous in Egyptian iconography and reflect the celebratory nature of royal ideology in this case by degrading enemies. Egyptologists have scrutinized these scenes for details regarding various military matters but existing scholarly literature offers few studies focused on enemy captives and the sheer physical brutality of the depictions of their bindings. Janzen examines the bound foreigner motif in New Kingdom sources demonstrating that these prisoners of war played vital roles in Egyptian ideology and religion. Their depictions in bizarre or torturous poses served to reinforce ideological underpinnings of pharaoh's right to rule perpetually ritualizing their defeat and or punishment through the presence of this iconography on ceremonial objects used primarily by the king and on temple walls and monuments. The subjugation of foreigners also constituted an important economic function as incorporating prisoners of war into the Egyptian workforce was crucial for economic prosperity and growth in New Kingdom Egypt. The volume also explores cross cultural and anthropological parallels placing Egyptian treatment of foreign prisoners in its ancient context. The book provides a fascinating study of the subject suitable for scholars and students of Egyptology and ancient history particularly that of New Kingdom Egypt as well as those working on power warfare and violence in the ancient world more broadly. *Egyptian Deportations of the Late Bronze Age* Christian Langer, 2021-09-20 *Egyptian Deportations of the Late Bronze Age* explores the political economy of deportations in New Kingdom Egypt ca 1550-1070 BCE from an interdisciplinary angle. The analysis of ancient Egyptian primary source material and the international correspondence of the time draws a comprehensive picture of the complex and far reaching policies. The dataset reveals their geographic scope economic and demographic impact in Egypt and abroad as well as their interconnection with territorial expansion international relations and labour management. The supply chain profiting institutions and individuals in Egypt as the well as the labour tasks origins and the composition of the deportees are discussed in detail. A comparative analytical framework integrates the Egyptian policies with a review of deportation discourses as well as historical premodern and modern cases and enables a global and diachronic understanding of the topic. The study is thus the first systematic investigation of deportations in ancient Egyptian history and offers new insights into Egyptian governance that revise previous assessments of the role of forced migration and unfree labour in ancient Egyptian society and their long term effects. **Specifications and Drawings of Patents Issued from the United States Patent Office** United States. Patent Office, 1893 **The Pinkerton Detective Series** , 1886 *Topological Polymer Chemistry* Yasuyuki Tezuka, Tetsuo Deguchi, 2022-02-25 This book provides a comprehensive description of topological polymers an emerging research area in polymer science and polymer materials engineering. The precision polymer topology designing is

critical to realizing the unique polymer properties and functions leading to their eventual applications The prominent contributors are led by Principal Editor Yasuyuki Tezuka and Co Editor Tetsuo Deguchi Important ongoing achievements and anticipated breakthroughs in topological polymers are presented with an emphasis on the spectacular diversification of polymer constructions The book serves readers collectively to acquire comprehensive insights over exciting innovations ongoing in topological polymer chemistry encompassing topological geometry analysis classification physical characterization by simulation and the eventual chemical syntheses with the supplementary focus on the polymer folding invoked with the ongoing breakthrough of the precision AI prediction of protein folding The current revolutionary developments in synthetic approaches specifically for single cyclic ring polymers and the topology directed properties functions uncovered thereby are outlined as a showcase example This book is especially beneficial to academic personnel in universities and to researchers working in relevant institutions and companies Although the level of the book is advanced it can serve as a good reference book for graduate students and postdocs as a source of valuable knowledge of cutting edge topics and progress in polymer chemistry
