The Practice of English Teaching Graham Owens,1970 No secondary teacher today is faced with such a demanding task as the teacher of English Research has emphasized the importance of language to the whole intellectual emotional and social growth and report after report has pushed the frontiers of English further onwards The teacher of English requires a number

of skills a depth of theory a diversity of knowledge and a familiarity with a wide range of literature which is truly daunting This book meets a real need and will be valued by all teachers of English from the student on school practice to the experienced teacher anxious to survey all aspects of current work in the 12-16 age range It is essentially a practical book arising out of the editors strongly felt needs for a comprehensive book which would translate the radical rethinking of the fifties and sixties into detailed descriptions of successful work They therefore invited a large number of the most experienced and well known teachers of English to write about some aspects in which they had special expertise and experience Although written independently these articles show a concern for finding meaningful and realistic ways of helping the individual pupil's grasp of language for his personal and intellectual needs They share a dislike of the artificial textbook exercise and an ability to invent instead methods of prompting the individual to talk write and read more fully There is a full consideration of the place of modern media in the classroom a lively exploration of the possibilities of drama as an integral part of English teaching and an unusually practical section of ways of encouraging wide reading The individual articles are linked by a perceptive commentary from the editors and each contributor has been given space enough to convey the detail of his subject so that this book of effective classroom practice not mere generalization
