**Supermen** Gardner Dozois, 2007-12-26 Mind expanding explorations of the future of the human form Our bodies and minds are malleable and only the imagination is the limit to the possible improvements From genetics to artificial enhancements humanity will alter the course of its own evolution Included here are more than twenty stories from the most imaginative writers in the field including Poul Anderson James Blish Eric Brown Ted Chiang Tony Daniel Samuel R Delany Greg Egan Joe Haldeman Geoffrey A Landis Paul McAuley Ian MacLeod David Marusek Tom Purdom Robert Reed Joanna Russ Robert Silverberg Brian Stableford Bruce Sterling Charles Stross Michael Swanwick Liz Williams Gene Wolfe Roger Zelazny

**War on the Human** Konstantinos Blatanis, Theodora Tsimpouki, 2017-05-11 The essays in this collection explore the question of the human both as a contested concept and as it relates to and functions within the wider global conjuncture The authors explore the theoretical underpinnings of the term human inviting the reader to reflect upon the contemporary human condition to identify opportunities and threats in the changes ahead and to determine what aspects of our species we should abandon or strive to maintain The volume approaches these ideas from a myriad of perspectives but the authors are united in their abstention from rejecting humanism outright or indeed fully endorsing posthumanism s teleological narrative of accelerated progress and perfectability Instead the authors argue that the term human itself is better understood as a concept perpetually undergoing revision and is necessarily subject to scrutiny The contributors here are thus concerned with investigating the following questions What does it mean to be human or to have a self What is the current place or status of the human in the contemporary world As technology is increasingly used to modify our bodies and minds to what extent should we alter and how can we improve our very understanding of human nature The authors contend that literature is the art form best placed to answer these questions In its dynamism and discursiveness literature has the capacity to both reflect dominant discourses and ideologies as well as to generate and even anticipate social change to critique and refine conventional ideas and existing cultural modes and to envision new possibilities for the future The human and its literary representation in other words are inherently intertwined

**Diversity in Disney Films** Johnson Cheu, 2013-01-04 Although its early films featured racial caricatures and exclusively Caucasian heroines Disney has in recent years become more multicultural in its filmic fare and its image From Aladdin and Pocahontas to the Asian American boy Russell in Up from the first African American princess in The Princess and the Frog to Spanish mode Buzz Lightyear in Toy Story 3 Disney films have come to both mirror and influence our increasingly diverse society This essay collection gathers recent scholarship on representations of diversity in Disney and Disney Pixar films not only exploring race and gender but also drawing on perspectives from newer areas of study particularly sexuality queer studies critical whiteness studies masculinity studies and disability studies Covering a wide array of films from Disney s early days and Golden Age to the Eisner era and current fare these essays highlight the social impact and cultural significance of the entertainment giant Instructors considering this book
