the contexts within which supervision takes place Their focus on the multi cultural aspects of supervision and their advocacy for anti oppressive practices is of note very accessible and highly recommended to beginning supervisees and seasoned supervisors alike This book will make a substantial contribution to the field for a long time to come Gillian Straker Professor of Psychology at the University of Sydney What are the primary goals of clinical supervision What is the basis for ethical decision making in supervision How can anti oppressive practice be embedded in the training of supervisors This book presents an integrative relational model for psychotherapy supervision The focus is on the primacy of the relationship both in psychotherapy and in supervision This is one of the few books in the field of supervision to focus exclusively and in depth on issues in clinical supervision It provides an integrative relational model of supervision drawing on developmental theory that is applicable to the fields of psychotherapy counselling and clinical and counselling psychology The authors believe that this integrative framework for supervision will be of use to supervisors of pure form approaches as well as to those supervisors involved in cross orientation supervision since its main focus is on the quality of the supervisory alliance Psychotherapy Supervision contains a balance of theoretical material examples of in vivo supervision and a discussion of techniques The book presents some interesting and innovative material on ethical decision making and on anti oppressive practice in training organisations The authors illustrate their material with frequent examples of supervision from their own practice to show the reader the model in action The book is aimed at supervisors of counsellors psychotherapists and psychologists at all levels

**Counselling Supervision** Michael Carroll,1996 There is without doubt a great need for a practical and theoretical framework through which supervisors primarily but also supervisees can negotiate the relationship of supervision This invaluable resource book gives a brief overview of the history of supervision and its importance in initial and ongoing counselling training reviewing both the British and US literature and brings together contemporary themes and debates within supervision The author presents his own linear model of supervision connecting goals functions and tasks and presents and analyses the seven tasks of supervision A model for the management of the supervisory process is then discussed outlining a five stage chronology of the steps through which a supervisory relationship travels Importantly the organizational dimension of supervision is studied in detail and a number of supervisory formats individual peer group and team are evaluated The concluding chapter on ethics is an attempt to offer a model of ethical decision making applicable to both counselling and supervision It reviews in some detail the various responsibilities of supervisors An appendix includes the revised Code of Ethics and Practice for Supervisors from BAC BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved     [Supervision](#) Moira Walker,Michael Jacobs,2006-02-22 Supervision is a prerequisite for all counsellors and for most psychotherapists yet until recently it has been assumed that any experienced counsellor or therapist could become a supervisor without any special expertise But the experience of those in supervision is sometimes of inadequate or even unhelpful work by their supervisors At the same time supervision is receiving considerable

attention as a discipline in its own right with an expanding literature on the dynamics of the supervisory couple or the supervisory triad since the client is a central if absent presence more attention is also being paid to the technical skills required of the supervisor This book addresses those issues both from the perspective of the supervisee and the supervisor suggesting what supervisees might expect from good supervision as well as offering guidance to supervisors on how best to use to the full the opportunities offered by a therapeutic situation which has some similarities but also some radical differences from counselling and therapy itself

It is a fairly well established cliché that while supervision is recognised as a crucial component of good practice in psychotherapy and counselling there is correspondingly little written about it this book is a good step in redressing the balance It is a practical didactic and generic view of how to do supervision giving a fairly comprehensive account of 30 of the formal skills that all supervisors probably use whether consciously or not The book discusses each of the skills giving examples as well as practical suggestions as to how to approach difficult issues directed principally at counsellors it is a book to dip into when faced with a panic about a specific issue Therapeutic Communities Supervision is a professional and ethical necessity for all counsellors providing them with consultative and supportive aid while protecting clients from potential abuse yet relatively little has been written on the subject This volume aims to redress that balance Encouraging yet sensitive to the difficult issues that frequently arise in supervision the book contains practical suggestions plus useful appendices to help practising and trainee supervisors develop and enhance the skills they need to be successful in their work The authors cover such key areas as creating a supervisory alliance fostering the supervisory relationship the use of tape recording highlighting supervisees strengths and weaknesses and protecting the client and counsellor *Supervision in the Mental Health Professions* Joyce Scaife,Francesca
