## **Surgery In Gynecological Oncology:**

**Surgery in Gynecological Oncology** A.P.M. Heintz, C.T. Griffiths, J.B. Trimbos, 2012-12-06 Gynecological oncology surgery has shown substantial progress in recent years. Most of the advances come from gynecologists with full time commitments to gynecological oncology. It is important for the general obstetrician gynecologist to be informed about the possibilities offered by modern gynecological oncology. Thus he or she may acquire new techniques which can be used in general gynecological practice. On the other hand it is essential to know what his or her colleagues specialised in gynecological oncology can offer in oncology centres. The chapters in this book are based on a post graduate course organised by the Boerhaave Committee for post graduate medical education of the medical faculty of the University of Leiden in the Netherlands. In view of the considerable interest shown by many highly qualified specialists we are extremely grateful to our contributors who were prepared to lucidly present their knowledge and expertise within the covers of the present book. One of the conclusion of this book must be that the special surgical skills needed for adequate treatment of gynecological cancer cannot be developed within general residency programs. Thus European gynecologists should examine whether and to what extent additional training as usual in the U S A is necessary. The editors want to thank the Royal College of Obstetricians and Gynecologists for their kind permission to reproduce the contribution of J A Jordan chapter 7 from pre clinical neoplasia of the cervix. **Laparoscopic Surgery in Gynaecological Oncology** D. Querleu,J. Childers,Daniel Dargent,1999-09-15 The introduction of endoscopic surgery to gynecological oncology is now ten years old The movement started in France and grew to the United States and we consider ourselves fortunate to have been some of the early investigators in the field We are also blessed that virtually all the early pioneers in this pursuit have been willing to contribute to this text As with any oncology text there is a great variation in each authors s philosophies on management Laparoscopy aside there is no universal consensus on the management of any gynecologic malignancy The introduction of laparoscopy in gynecologic oncology only compounds an already complex area and of course makes a controversial topic even more so We respect these individual and regional philosophic differences and encourage the reader of this text to read between the lines
