## **The Human Dilemma:**

The Human Dilemma Barbara Dole Larsen, 2009-12 Who has never wondered why people behave the way they do They create glorious music art and literature They have uncovered the secrets of the universe and disease yet have not been able to figure out how to get along with each other without war The Human Dilemma sets out to find out why It describes how humans evolved how their wonderful brains work and what they are like when they are born The author explores the reasons individuals grow up with different personalities depending on the societies in which they mature from hunter gatherers in Africa to industrial Americans She then turns to relationships between the sexes the temptations of power and why religious differences lead to violence The Human Dilemma explains in simple readable language how human nature customs and beliefs interfere with mankind's ability to resolve the overwhelming problems facing the world today Violent conflicts between cultures have become more volatile over the years Many believe it is man's nature to fight yet ancient civilizations like Crete were peaceful and everyone was treated equally women as well as men The same is true of two hunting gathering tribes in Africa that have followed the same way of life for thousands of years Perhaps it is just as human to cooperate peacefully in solving problems as it is to fight over them and just as human to see our fellows as equal instead of superior or inferior Why then do men regard women as inferior in so many societies And why do so many nations plunge into battle especially since the invention of nuclear bombs makes it possible to wipe out our entire species The newest peril is global warming caused by the spewing of carbon into the atmosphere from burning fossil fuels which may eventually change our climate back to the days before mankind existed Some animals have already become extinct because they cannot adjust to warmer weather Humans may not survive such a drastic change Our magnificent brains are capable of inventing solutions to all the problems confronting us and entrepreneurs are eager to put these inventions into practice Why then don't we do it Is there some flaw in our nature that makes it easier to blame each other instead and find excuses for relieving our frustrations in warfare As the author studied the sciences for answers to her questions she became convinced that only by fully understanding our nature and the reasons why it is difficult for us to confront our problems can we hope to resolve them and continue to survive Her conclusions are found in The Human Dilemma An original and thought provoking book which will appeal to a very wide audience Richard Edelman Psychoanalyst In her wonderfully wide ranging exploration of human nature Barbara Larsen has distilled her research into a lucid and absolutely fascinating book Richard Edelman Psychoanalyst The writer's style is open and exploratory warmly self sharing and it is an enjoyable as well as a searching and provocative learning experience Saul L Brown Emeritus Chairman Department of Psychiatry Cedars Sinai Medical Center Los Angeles CA Larsen skillfully weaves together current theory and research from an impressive variety of sources Arthur A Dole Emeritus Professor of Education University of Pennsylvania

**PSYCHOLOGY, FOLKLORE, CREATIVITY AND THE HUMAN DILEMMA** Julius E. Heuscher, 2003-01-01 In Psychology Folklore Creativity and the Human Dilemma the author explores the

meaning of folklore and its usefulness in education and psychotherapy The author s interest has expanded into other fields that challenge and question the limits of our everyday horizons namely into operas plays and humor as well as into new approaches to the meaning of human existence explored by modern thinkers These various fields often interact explain and enrich each other The book aims for deepening the awareness of our ultimate human concerns the meaning of authenticity and the urgent need for radical long term commitments The present volume focuses almost entirely on the role of folklore in expanding and enriching a person s horizons on the challenges by modern writers in terms of the need to radically alter the paradigm of Western society that has brought the blessings of technology led to a fragmentation of our psyche and threatens the very essence of our subjectivity Throughout the book there is both the hidden and the overt implication that simply liking appreciating or agreeing with insightful ideas and suggestions presented by anyone are absolutely worthless or may even be counterproductive if the readers do not translate into changes and actions the ideas that are most meaningful to them and if they do not do so in their family social political and spiritual life

**THE HUMAN DILEMMA** Animals by Nature Humans 2 0 by Nurture THIS BOOK CONTAINS EDUCATION BEYOND THE CLASSROOM The greatest achievement a human can accomplish it to find the meaning of human life ANIMALS BY NATURE All animals humans included are given the proclivity to engage in procreative sex and the ability to rear their offspring This is simply nature s way of preventing extinction of the various species But it s only the human animal that is given the potential to do more much more Socrates proclaimed an UN EXAMINED life is not worth living I proclaim You ll never know you re in the dark until you FIND the light SEEK WHAT This book is a combination textbook and workbook With it you will be able to examine in detail every relevant aspect of human life It includes the text information and instructions tools analytical exercises tips and techniques needed to understand and then resolve the Human Dilemma Animals by Nature Humans 2 0 by Nurture WHY Because 21st century personal societal and planetary problems demand a significantly more powerful You Humankind has reached an all time high in human on human pain and suffering and good people must self transform into powerful people if this out of control suffering is to be controlled Make no mistake these problems are intractable difficult but not insoluble impossible HOW Resolve the Human Dilemma That is strengthen yourself then you will be in a position to strengthen those around you and as a naturally occurring byproduct you will improve the human condition making this a better world PERSPECTIVE By natural and societal forces we have each been PROGRAMMED and therefore we have a WSoS Weak Sense of Self In other words our knowledge of self comes from others giving us little or no input as to who we are Only thru Self Transformation can we obtain an SSoS Strong Sense of Self The Self Transformation Know Thyself process requires you to examine human life in general and your life in particular In short you must find and define You without the input of others This book will guide you through the process Again this is education

beyond the classroom HOW HUMAN PROGRAMMING WORKS Nature gives us certain physical attributes These attributes include race gender facial appearance body shape fat thin tall short etc Society shapers use these attributes as the foundation for racism sexism ugly pretty etc This PROGRAMMING forms a Glass Ceiling which keeps each of us in our place and of course obedient to authoritative rule be they right or wrong good or bad For proof do an internet search on Dr Milgram and you ll see that we ve all been PROGRAMMED to be weak sustainers of the status quo followers of leaders good or bad Dr Milgram s study has been repeated in recent years see Eli Roth et al proof that time does not change us While passively existing under the Glass Ceiling you will only know you relative to other humans You will never know the True powerful You as in Know Thyself Plainly put the Human Dilemma revolves around the fact that we humans have two selves There is a relative self and there is an absolute self Nature and society defines the relative self and puts us in our place under the Glass Ceiling For example whites and blacks like males and females are put into their societally designated places How else could racism and sexism continue to thrive into the 21st century These boundaries or boxes keep the rank in file divided and conquered How else can 1% of the people own more wealth than 99% of the people I leave off with the following You ll never know you re in the dark until you FIND the light SEEK
