The Human Subject The Social Psychology Of The Psychological Experiment:

The Human Subject John G. Adair, 1973 For the past fifty years one fundamental aspect of the methodology of psychology has resisted evolution and growth the relationship of the human subject to the psychological experiment Adopting the natural science model of the experimental method we have regarded the interaction of subject experimenter and study as fixed and the laboratory as a methodologically sterile setting for the study of behavior Recent research on the social psychology of the psychological experiment has proved us wrong Research has revealed social contamination in the laboratory the subject and experimenter provide a stimulus for each other their respective attitudes feelings and expectations influencing the data that are collected This research as proposed ways to control or measure subject and experimenter bias in a study as well as alternatives to the traditional laboratory experiment Because of its diversity however it is not easily interpretable and its implications for methodological changes are not clear This book provides an integrated view of this research and speculates on its implications for future experimentation It is hoped that readers will gain from it a mature understanding of the experimental process concern for its human element and an appreciation of some of the unique controls they must exercise *The Human Subject in the Psychological Laboratory* I. Silverman, 2013-10-22 Written for anyone who does or plans to do behavioral research this book is based on the thesis that the psychological laboratory is a special place for people brought there as subjects Accordingly subjects act in ways that bear little relationship to their behaviours in the life situations to which psychologists seek to generalize their findings An analysis is given of the motives feelings and intentions common to people who assume the role of psychological subjects The ways in which their responses confound data and lead to spurious conclusions are described Impression Management Theory and Social Psychological Research James T. Tedeschi, 2013-09-24 Impression Management Theory and Social Psychological Research gathers together the various strands of thinking and research on impression management This book does not easily lend itself to a singular organization Not only do the authors deal with very different topics they sometimes disagree with one another on assumptions and interpretations Nevertheless there are chapters that tend to group together The book can be organized into six parts Part I General Theory consists of chapters that deal primarily with issues related to the reasons for and specific tactics of impression management Part II Impression Management and Laboratory Research includes two chapters that make a major contribution to the social psychology of the experiment Part III Attitudes as Tactics of Self Presentation centers around the concept of attitudes The chapters in Part IV Self Presentation and Harm Doing are organized around the theme of harm doing Part V Bargaining Distributive Justice and Impression Management focuses on the distribution of rewards in groups Part VI Individual Differences and Impression Management is concerned with individual differences such as mental illness social anxiety and shyness Principles and Methods of Social Research William D.
