## **The Higher Education Of Women:**

*The Higher Education of Women* Emily Davies, 2020-09-28 IN any inquiry of a practical nature intended to lead to some definite course of action it is obviously necessary to start with a tolerably clear idea of the end in view the object for which it is proposed to provide In the case of education definitions more or less satisfactory have already so often been given that it might seem superfluous to go into the question again As a matter of practice however it is found that when it is attempted to apply the received definitions of the general objects of education to the case of women they are usually questioned or modified if not altogether set aside When for instance Mr Maurice tells us that the end of education itself is as it has always been considered to form a nation of living orderly men the definition will be accepted with the tacit reservation that it applies only to men in the exclusive sense of the word and has nothing to do with the education of women Again when Milton in his treatise on Education lays down that the end of learning is to repair the ruin of our first parents by regaining to know God aright and out of that knowledge to love Him to imitate Him to be like Him the language might be taken in a general sense and when he goes on to define a complete and generous education as that which fits a man to perform justly skilfully and magnanimously all the offices both private and public of peace and war the words might still perhaps bear a common interpretation but as soon as he comes to describing in detail how all this may be done between twelve and one and twenty it becomes evident that he is thinking of boys only In the most recent writers the tendency to regard general theories of education as applying exclusively to that of men is quite as strongly marked It seems therefore that in attempting to treat of female education it is necessary once more to ask what we are aiming at and to obtain if possible a clear understanding and agreement as to the end in view What ought the educators of girls to be trying to make of them What is the ideal towards which they ought to direct their efforts the end to be desired as the result of their labours

**Higher Education of Women in Europe** Helene Lange, 2015-06-25 Excerpt from Higher Education of Women in Europe The battle for the higher education of women has been fought in this country but we can not yet say that it has been fought out Up to the generation of men now living the question had not been agitated The few instances of institutions attempting collegiate instruction of women and the still fewer experimenting with co education in colleges were not accepted as forerunners of a movement likely to become general The majority of public high schools throughout the country thirty years ago and the normal schools were testing by co education the relative ability of girls to pursue secondary studies in the same classes with boys The result is well known The girls proved their capability to perform the same intellectual tasks as boys What they lacked at first in the qualities of originality and assimilative power they made up in memory and delicacy of appreciation Many girls excelled the average boy even in originality About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged

**The Rise of Women in Higher Education** Gary A. Berg, 2019-11-28 The story of the American university in the past half century is about the rise of women in participation as students faculty members college athletes and in subsequently changing the overall university culture for the better Now almost sixty percent of the overall college student population in America is female and still growing By the year 2000 women surpassed men worldwide in attendance at higher education institutions At the same time after years of a disproportionate dominant male professoriate female faculty members are now becoming the majority of university professors While top university presidents are still largely male women have achieved real gains in the overall administrative ranks and trustee positions In all areas of the university disparities still exist in terms of compensation and balance in key areas of the academy but the overall positive trend is clear Few to this date have recognized and chronicled this extraordinary change in college education one of society's fundamental and influential institutions For universities the test for the future is to make the changes needed in broad areas within higher education from financial aid to curriculum student activities and overall campus culture in order to better foster a newly empowered majority of women students

**The Changing Role of Women in Higher Education** Heather Eggins, 2016-10-11 This book sets out to examine the changing role of women in higher education with an emphasis on academic and leadership issues The scope of the book is international with a wide range of contributors whose expertise spans sociology social science economics politics public policy and linguistic studies all of whom have a major interest in global education The volume examines the ways in which the leadership role and academic roles of women in higher education are changing in the twenty first century offering an up to date policy discussion of this area It is in some sense a sequel to the earlier volume by the same Editor *Women as Leaders and Managers in Higher Education* but with very different emphases The pressures now are to respond to the demands of the technological age and to those of the global economy Today there are more highly qualified and experienced female academics and more expectation of their gaining the highest posts Challenges still remain particularly in terms of the top posts and in equal pay The discussion of global policy issues affecting the role of women in higher education is combined with country case studies several of which are comparative Together they examine and unpack the particular situations of women in a wide range of higher education systems from Brazil to the US to Europe to Africa and the Far East noting the shift towards more flexibility more personal choice and a greater acceptance by society of their

abilities This volume is a useful and influential addition to published work in this area and is aimed at the intelligent general reader as well as the scholar interested in this topic

**The Higher Education of Women in England and America, 1865-1920** Elizabeth Seymour Eschbach, 2016-11-18 This study first published in 1993 traces the path of women toward intellectual emancipation from eighteenth century precedents through the hard won access to college education in the nineteenth century to the triumphs of the early 1900s The author compares women s experiences in both the US and England and will be of interest to students of history education and gender studies

**Gender and the Modern Research University** Patricia M. Mazón, 2003 In the 1890s German feminists fighting for female higher education envied American women their small colleges Yet by 1910 German women could study at any German university a level of educational access not reached by American women until the 1960s This book investigates this development as well as the cultural significance of the tremendous debate generated by aspiring female students Central to Mazón s analysis is the concept of academic citizenship a complex discourse permeating German student life Shaped by this ideal the student years were a crucial stage in the formation of masculine identity in the educated middle class and a female student was unthinkable Only by emphasizing the need for female gynecologists and teachers did the women s movement carve out a niche for academic women Because the nineteenth century German university was the model for the modern research university the controversy resonates with contemporary American debates surrounding multiculturalism and higher education

[Higher Education of Women in Europe](#) Helene Lange, 1890 [Women's Higher Education in the United States](#) Margaret A. Nash, 2017-08-24 This volume presents new perspectives on the history of higher education for women in the United States By introducing new voices and viewpoints into the literature on the history of higher education from the early nineteenth century through the 1970s these essays address the meaning diverse groups of women have made of their education or their exclusion from education and delve deeply into how those experiences were shaped by concepts of race ethnicity religion national origin Nash demonstrates how an examination of the history of women s education can transform our understanding of educational institutions and processes more generally

*Women in Higher*

*Education* Ana M. Martínez Alemán, Kristen A. Renn, 2002-12-13 The only comprehensive encyclopedia on the subject of women in higher education America's first wave of feminists Susan B Anthony Elizabeth Cady Stanton and others included expanded opportunities for higher education in their Declaration of Sentiments at the first Women's Rights Convention in Seneca Falls New York in 1848 By then the first American institutions to educate women had been founded among them Mt Holyoke Seminary in 1837 However not until after the Civil War did most universities admit women and not for egalitarian purposes War casualties had caused a drop in enrollment and the states needed teachers Women students paid tuition but as teachers were paid salaries half that of men By the late 20th century there were more female than male students of higher education but women remained underrepresented at the higher levels of educational leadership and training This volume covers everything from historical and cultural context and gender theory to women in the curriculum and as faculty and administrators

*Women in Higher Education, 1850-1970* E. Lisa Panayotidis, Paul Stortz, 2017-09-19 This edited collection illustrates the way in which women's experiences of academe could be both contextually diverse but historically and culturally similar It looks at both the micro individual women and universities and macro level comparative analyses among regions and countries within regional national trans national and international contexts The contributors integrally advance knowledge about the university in history by exploring the intersections of the lived experiences of women students and professors practices of co education and intellectual and academic cultures They also raise important questions about the complementary and multidirectional flow and exchange of academic knowledge and information among gender groups across programmes disciplines and universities Historical inquiry and interpretation serve as efficacious ways with which to understand contemporary events and discourses in higher education and more broadly in community and society This book will provide important historical contexts for current debates about the numerical dominance and significance of women in higher education and the tensions embedded in the gendering of specific academic programs and disciplines and university policies missions and mandates

*Women in Higher Education* JoAnn DiGeorgio-Lutz, 2002-08-30 More women are receiving advanced degrees and ascending to the ranks of deans provosts and presidents but despite gains in advancing gender equality efforts at true empowerment are still met with significant resistance within academia The contributors to this collection are committed to promoting the issue of gender and empowering women in higher education The approach of this book is both theoretical and applied On one level it evaluates pedagogy from the perspective of what we teach how we teach and curriculum development that enables and empowers women On the other level it examines the institutional barriers that continue to exist that thwart the educational development of women while also examining the areas in which institutional support does promote efforts toward change Women are the growing majority population yet women in higher education are not provided an equal education This book includes strategies for change teaching suggestions and curriculum development ideas

*Perspectives on Women's Higher Education Leadership from around the World* Karen Jones, Arta Ante, Karen A.

Longman, Robyn Remke, 2018-10-30 This book is a printed edition of the Special Issue Perspectives on Women's Higher Education Leadership from around the World that was published in Administrative Sciences *The Educated Woman* Katharina Rowold, 2011-02-09 The Educated Woman is a comparative study of the ideas on female nature that informed debates on women's higher education in the late nineteenth and early twentieth centuries in three western European countries Exploring the multi-layered roles of science and medicine in constructions of sexual difference in these debates the book also pays attention to the variety of ways in which contemporary feminists negotiated and reconstituted conceptions of the female mind and its relationship to the body While recognising similarities Rowold shows how in each country the higher education debates and the underlying conceptions of women's nature were shaped by distinct historical contexts
