The High-Tech Potential Amy K. Glasmeier, 2012-05-01 Originally published in 1991 by the Center for Urban Policy Research New Brunswick NJ

The High-Tech Potential Amy K. Glasmeier, 2017-07-05 Rural America is at a crossroads in its economic development Like regions of other First World nations the traditional economic base of rural communities in the United States is rapidly deteriorating Natural resources including agriculture show little prospect for generating future job growth and manufacturing has become a new source of instability Faced with these changes and an increasing vulnerability to international economic events rural communities have begun to seek high technology industries and advanced services as candidates for job growth and economic stability What is the potential for high tech growth outside the largest cities What is the role of high tech industry in the economic development of non metropolitan America This book provides a hard nosed look at the high tech potential in rural economic development Some of the questions Glasmeier addresses include Are rural areas attractive to high tech Will high tech follow earlier patterns and filter down the lowest paid jobs to rural areas Will rural communities be bypassed completely for even lower wage Third World locations Glasmeier answers in a sober analysis that separates fact from myth Empirical data reveals the kinds of high tech jobs that locate in rural areas and the kinds of rural areas that attract high tech jobs This analysis leads to a highly critical evaluation of state and local economic development policy and recommendations for its improvement This book is a must for policymakers practitioners scholars and an informed public interested in the promise of high tech and the future of US economic development

The Changing American

Countryside Emery N. Castle, 1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery Castle offers *The Changing American Countryside* a volume that will forever change how we look at this important subject Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands These authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity The authors are especially effective in demonstrating why rural America is so much more than just agriculture It is in fact highly diverse complex and interdependent with urban America and the international market place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections To do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life **After the Factory** James J.

Connolly, 2010-10-14 The most pressing question facing the small and mid sized cities of America's industrial heartland is how to reinvent themselves Once thriving communities in the Northeastern and Midwestern U S have decayed sharply as the high wage manufacturing jobs that provided the foundation for their prosperity disappeared A few larger cities had the resources to adjust but most smaller places that relied on factory work have struggled to do so Unless and until they find new economic roles for themselves the small cities will continue to decline Reinventing these smaller cities is a tall order A few might still function as nodes of industrial production But landing a foreign owned auto manufacturer or a green energy plant hardly solves every problem The new jobs will not be unionized and thus will not pay nearly as much as the positions lost The competition among localities for high tech and knowledge economy firms is intense Decaying towns with poor schools and few amenities are hardly in a good position to attract the creative class workers they need Getting to the point where they can lure such companies will require extensive retooling not just economically but in terms of their built environment cultural character political economy and demographic mix Such changes often run counter to the historical currents that defined these places as factory towns *After the Factory* examines the fate of industrial small cities from a variety of angles It includes essays from a variety of disciplines that consider the sources and character of economic growth in small cities They delve into the history of industrial small cities explore the strategies that some have adopted and propose new tacks for these communities as they struggle to move forward in the twenty first century Together they constitute a unique look at an important and understudied dimension of urban studies and globalization **Quick Bibliography Series** ,1976 **Cities**

in the Technology Economy Darrene Hackler, 2014-12-18 Recognizing the pivotal role that local governments play in the high tech economy this book examines the effect of technology industries and infrastructures on cities and the local policy actions required for effective response to these challenges Filled with fresh information and practical advice Cities in the Technology Economy provides a thorough coverage of the technology economy with respect to cities and economic development focusing on the attraction of technology industries and investment in technology infrastructure The author utilizes a triangulation of approaches national level data nationwide survey of local officials and case studies to examine what cities are doing in the technology economy describe the barriers to participation in the technology economy and detail entrepreneurial actions of local governments to traverse these hurdles All of the research points to the need for a strong local role enabling local policy action and activities to shape a technology economy response **Forum for Applied Research and Public Policy**, 1992 **Planning**, 1991 **Future Survey Annual 1988-1989** Michael Marien, Lane Jennings, 1990-01-01 BMW Z cars have carved a huge reputation for themselves in a very short time From the revolutionary and innovative Z1 of the late 1980s to the beautiful and exclusive Z8 of more recent times via the popular Z3 and its controversial replacement the Z4 the family has made BMW's name in the increasingly competitive sports car market *Environment and Planning*, 1993 *Industrial Structure and Socioeconomic Well-being in the Nonmetropolitan U.S., 1980-1990* James Cruise, 1995 *Encyclopedia of Rural America: N-Z*, 2008 History sociology anthropology and public policy are combined to deliver the encyclopedia destined to become the standard reference work in American rural studies From irrigation and marriage to games and mental health this encyclopedia is the first to explore the contemporary landscape of rural America placed in historical perspective With over 300 articles prepared by leading experts from across the nation this timely encyclopedia documents and explains the major themes concepts industries concerns and everyday life of the people and land who make up rural America Entries range from the industrial sector and government policy to arts and humanities and social and family concerns Articles explore every aspect of life in rural America Encyclopedia of Rural America with its broad range of coverage will appeal to high school and college students as well as graduate students faculty scholars and people whose work pertains to rural areas Publisher **Science-based Economic Development** Susan Ueber Raymond, 1996 This international study on ways of linking science and technology to economic growth and innovation stresses that university government industry partnerships are essential for success in the global marketplace Its analysis of specific case studies emphasises the need to unify the economic and science policies affecting various regions Hands on policy makers from industrial and developing countries executives from the public private and academic sectors discuss key issues for promoting science based development Coverage includes the equity issues of science based strategies the framework for establishing university government industry partnerships the entrepreneurial university and the essential human resources issues for sustainability into the next millennium **Rural Economic Technical Assistance Center**
