**White Power and American Neoliberal Culture** Patricia Ventura, Edward K Chan, 2023-04-11 White Power and American Neoliberal Culture uncovers the intersection of two seemingly separate cultural forces in the US white power ideology and neoliberalism Working through artifacts such as utopian fiction manifestos written by white power terrorists neoliberal think tank reports and neoconservative policy statements the authors analyze the current forms of white supremacy and neoliberal racial capitalism to show how they reinforce each other by fetishizing the white family Drawing on scholars from a wide variety of disciplines the book contextualizes the increase of both white ethnonationalism and social and economic inequality that mark the US in the 2020s

**The Raven** Derek Ratcliffe, 2010-01-31 The Raven presents a summary of knowledge of its natural history describing its distribution feeding habits association with other animals and breeding The Raven is one of the most spectacular and romantic of British birds but relatively neglected in the modern literature of ornithology Derek Ratcliffe here presents a thorough summary of our knowledge of its natural history emphasizing the long association of the bird with humankind The place of the Raven in myth legend and history is long established and this book describes the bird's fall from grace as a valued scavenger in medieval cities to a persecuted outcast in the modern wilds The previous wide occurrence of Ravens is reviewed against the relationships between their present distribution status and habitat requirements as both a nesting and a non breeding resident The dependence of Ravens on carrion especially sheep within an omnivorous diet is the key to the species ecology and its social behaviour has evolved in close relation to this lifestyle The flocking and communal roosting of non breeders are major features of Raven behaviour while their nesting habits emphasise the territorial nature of breeding birds and their adaptation to secure but harsh environments Raven numbers vary in relation to their food supply local populations adjusting accordingly although the precise mechanism involved is still obscure Ravens have a considerable capacity for recolonising old haunts when suitable conditions are restored as well as exploiting new areas where the habitat becomes favourable and there are local success stories to tell Nationwide however the species position is delicately balanced and depends on both sympathetic land management practices and improving attitudes to Ravens as friends not foe Worldwide Ravens are one of the most successful of all bird groups occurring over a large part of the northern hemisphere and replaced in some southern and tropical regions by other raven species which exploit the familiar raven niche in their own environments The discussion of the northern hemisphere species is enlivened by reference to other species where useful Finally the Raven's age old reputation for high intelligence is weighed critically against the available evidence Today Ravens carry a new omen in the modern world as a barometer of goodwill to wildlife Like those in the Tower of London the continued
