## **The Historian As An Archivist:**

Processing the Past Francis X. Blouin, William G. Rosenberg, 2011 This lively book explores the changes taking place in history and the archives as a result of new concepts practices and technologies Among other issues it raises the question of what future historical archives will be like if scholars and archivists cannot understand each others work The Archivist and the Historian William Kaye Lamb, 1963 **Archival Research in Historical Organisation Studies** Gabrielle Durepos, Amy Thurlow, 2025-02-19 Archival Research in Historical Organisation Studies Theorising Silences offers an accessible account of theorising the archive contesting the narrow definitions of the archive with a view beyond a mere repository of documents **The American Archivist**, 2001 Includes sections Reviews of books and Abstracts of archive publications *The Historian*, 1952 **Archivists and Historians**, 2015 The Birth of the Archive Markus Friedrich, 2018-02-26 The dynamic but little known story of how archives came to shape and be shaped by European culture and society Advances In The History Of Mathematics Education Alexander Karp, 2022-06-20 This book is a collection of scholarly studies in the history of mathematics education very abbreviated versions of which were presented at the ICMI Congress in 2021 The book discusses issues in education in Brazil and Belgium in Poland and Spain in Russia and the United States Probably the main factor that unifies the chapters of the book is their attention to key moments in the formation of the field of mathematics education Topics discussed in the book include the formation and development of mathematics education for women the role of the research mathematician in the formation of standards for writing textbooks the formation of curricula and the most active figures in this formation during the New Math period the formation of certain distinctive features of curricula in Poland the formation of the views of David Eugene Smith and the influence of European mathematics education on him the formation of the American mathematics community and the creation of such forms of student assessment as entrance exams to higher educational institutions The book is of interest not only to historians of mathematics education but also to wide segments of specialists in other areas of mathematics education *The James Stuart Archive of Recorded Oral Evidence Relating to the History of the Zulu and Neighbouring Peoples* Colin de B. Webb, John B. Wright, 1976 James Stuart was one of the most remarkable Natalians of his day Though there was nothing outwardly spectacular about his career as a colonial official in 25 years of single minded labour he built up what is now regarded as the most valuable collection of African oral traditions in existence in southern Africa As a magistrate in some of the remotest corners of the Natal colony in the 1890s and early 1900s Stuart sought out old people who remembered the times of Dingane and Mpande and whose fathers and mothers had been ruled by Shaka Interviewing them in fluent Zulu he painstakingly filled hundreds of notebooks with their reminiscences and the traditions which older generations had handed down to them The statements which Stuart recorded from nearly 200 informants are now housed together with his own writings on Zulu customs language and praise poetry in the Killie Campbell Africana Library in Durban Since 1971 the

department of Historical and Political Studies at the University of Natal Pietermaritzburg has been engaged in a project which aims to publish all the historical evidence collected by Stuart
