Translated... by E. J. Hatfield,... Emanuel Rádl,1930* *The History of Creation* Ernst Heinrich Philipp August Haeckel,1876 **Biological Theory on a Holistic Basis** Walter M. Elsasser,1982 **The History of Creation** Ernst Haeckel,1906 **The Study of Society (RLE Social Theory)** F.C. Bartlett,2014-08-21 There is today widespread recognition of the fact that the future of human civilization depends to a high degree upon Man's capacity to understand the forces and factors which control his own behaviour. Such understanding must be achieved not only as regards individual conduct but equally as regards the mass phenomena resulting from group contacts which are becoming increasingly intimate and influential. Until this present volume nowhere have the three sciences of sociology, psychology and social anthropology been properly mobilized to deal with the social problems which yearly grow more pressing. The essays in this book aim to address this *The Foundations of Biological Theory* Edgar Howard Mercer,1981 **Genetic Influences on Human Fertility and Sexuality** Joseph Lee Rodgers,David C. Rowe,Warren B. Miller,2012-12-06 Recent work in quantitative biology has shown theoretically why Fisher's Fundamental Theorem of Natural Selection does not preclude genetic influences on fertility, sexuality and related processes. *Genetic Influences on Human Fertility and Sexuality* takes the next step and presents a number of successful empirical searches for such genetic influence on a broad range of processes such as puberty, marriage, sexual behavior and twinning. Employing a broad range of methodological approaches including molecular and behavioral genetics, this book weaves a new theoretical framework that shows how genes can help relate fertility planning to fertility outcome and how puberty, sexuality, marriage and reproduction can be conceptually linked through the genes that contribute to individual differences in the human process *International Journal of Ethics* ,1896
