**The Journal of Neuroscience** ,2009      *Biopolitics After Neuroscience* Jeffrey P. Bishop,M. Therese Lysaught,Andrew A. Michel,2022-05-19 This book offers a provocative analysis of the neuroscience of morality Written by three leading scholars of science medicine and bioethics it critiques contemporary neuroscientific claims about individual morality and notions of good and evil Winner of a 2021 prize from the Expanded Reason Institute it connects moral philosophy to neoliberal economics and successfully challenges the idea that we can locate morality in the brain Instead of discovering the source of morality in the brain as they claim to do the popularizers of contemporary neuroscience are shown to participate in an understanding of human behavior that serves the vested interests of contemporary political economy Providing evidence that the history of claims about morality and brain function reach back 400 years the authors locate its genesis in the beginnings of modern philosophy science and economics They further map this trajectory through the economic and moral theories of Francis Bacon David Hume Jeremy Bentham John Stuart Mill and the Chicago School of Economics to uncover a pervasive colonial anthropology at play in the neuroscience of morality today The book concludes with a call for a humbler and more constrained neuroscience informed by a more robust human anthropology that embraces the nobility beauty frailties and flaws in being human

**The Tools of Neuroscience Experiment** John Bickle,Carl F. Craver,Ann-Sophie Barwich,2021-12-30 This volume establishes the conceptual foundation for sustained investigation into tool development in neuroscience Neuroscience relies on diverse and sophisticated experimental tools and its ultimate explanatory target our brains and hence the organ driving our behaviors catapults the investigation of these research tools into a philosophical spotlight The chapters in this volume integrate the currently scattered work on tool development in neuroscience into the broader philosophy of science community They also present an accessible compendium for neuroscientists interested in the broader theoretical dimensions of their experimental practices The chapters are divided into five thematic sections Section 1 discusses the development of revolutionary research tools across neuroscience s history and argues to various conclusions concerning the relationship between new research tools and theory progress in neuroscience Section 2 shows how a focus on research tools and their development in neuroscience transforms some traditional epistemological issues and questions about knowledge production in philosophy of science Section 3 speaks to the most general questions about the way we characterize the nature of the portion of the world that this science addresses Section 4

discusses hybrid research tools that integrate laboratory and computational methods in exciting new ways Finally Section 5 extends research on tool development to the related science of genetics The Tools of Neuroscience Experiment will be of interest to philosophers and philosophically minded scientists working at the intersection of philosophy and neuroscience
