**The Human Predicament:**

**Dissolution and Wholeness [by] George W. Morgan** George W. Morgan, *The Social Relations of Physics, Mysticism, and Mathematics* S. Restivo, 2012-12-06 The problems I address in this book are among the least studied in the sociology of science and knowledge Part I is a critique of the claim that there are parallels between ancient mysticism and modern physics and a sociological analysis of this claim as a strategy in intellectual conflict This study must ultimately be rooted more firmly in a type of sociology of knowledge that is just now beginning to crystallize and which I discuss in Chapter 7 and a sociology of religion that is not so much unknown as underground and timid that is a non worshipful materialist sociology of religion My study of physics mysticism parallelism is a vehicle for exploring epistemic strategies I thus conclude Part I by sketching a materialist emancipatory epistemic strategy My conclusion brings together a number of ideas formulated by myself and others over the past several years but stops short of a systematic synthesis A more integrated and coherent model than what I can sketch here must wait on the results of research now in progress in the critical as opposed to apologetic or worshipful sociology of knowledge

**Invisible Nature** Kenneth Worthy, 2013-08-06 A revolutionary new understanding of the precarious modern human nature relationship and a path to a healthier more sustainable world Amidst all the wondrous luxuries of the modern world smartphones fast intercontinental travel Internet movies fully stocked refrigerators lies an unnerving fact that may be even more disturbing than all the environmental and social costs of our lifestyles The fragmentations of our modern lives our disconnections from nature and from the consequences of our actions make it difficult to follow our own values and ethics so we can no longer be truly ethical beings When we buy a computer or a hamburger our impacts ripple across the globe and dissociated from them we can't quite respond Our personal and professional choices result in damages ranging from radioactive landscapes to disappearing rainforests but we can't quite see how Environmental scholar Kenneth Worthy traces the broken pathways between consumers and clean room worker illnesses superfund sites in Silicon Valley and massively contaminated landscapes in rural Asian villages His groundbreaking psychologically based explanation confirms that our disconnections make us more destructive and that we must bear witness to nature and our consequences Invisible Nature shows the way forward how we
