**Origin, Evolution, Environmental Impact of Oceanic LIPs** Clive R. Neal, William W. Sager, Takashi Sano, Elisabetta Erba, 2015-05 The origin evolution and environmental impact of large igneous provinces LIPs represents a topic of high scientific importance because the magmatism associated with these features cannot be directly related to plate tectonics and because the eruption of flood basalts may have global environmental consequences Oceanic LIPs are even more poorly understood due to their relative inaccessibility This volume takes a multidisciplinary approach to understanding LIP origin evolution and environmental impact in ocean basins Papers that focus on plate tectonic reconstructions petrologic and geophysical investigations of various LIPs and sedimentological

and micropaleontological evidence of syn LIP sediments are presented Precious materials and data from dredging cruises and scientific ocean drilling expeditions have made this volume possible      **Plates, Plumes, and Planetary Processes**

the rising sea level going to cause flooding where I live How does overfishing damage the reef Is the water clean where I surf Living on the Shores of Hawai i discusses the paradox of environmental loss under a management system considered by many to be one of the most stringent in the nation It reviews a wide range of environmental concerns in Hawai i with an eye toward resolution by focusing on place based management a theme consistent with and borrowing from the Hawaiian ahupua a system After describing a typical situation in Hawai i where a sandy beach is lost because a seawall has been built to protect a poorly sited home the authors step back in time to trace land use practices before and after the arrival of Westerners and the increased tempo of destruction following the latter They go on to discuss volcanoes and the risk of placing homes in locations vulnerable to natural hazards and the potential dangers of earthquakes and tsunamis to a complacent public Water issues including scarcity flooding and pollution are surveyed as well as climate change and the possible outcomes of projected sea rise for Hawai i The authors explain coastal erosion and beach loss and the problems of overfishing and ocean acidification Later chapters assess residents risks to hurricanes offering mitigation techniques and provide a summary and some management conclusions As tensions increase because of conflicting standards misunderstandings and contradictory ideals and actions we put our economy and quality of life at risk Sound decision making begins with asking the right questions This book addresses these questions within the context of sustainability and thus their influence on the future of Hawai i
