

Stephen Hawking Bibliography

Gilu G Ettaniyil

Abstract

Stephen Hawking has numerous publications which include books, papers and conference presentation on the areas of cosmology, general relativity and quantum gravity, especially in the context of black holes. In the 1960s and 1970s, he worked on ground-breaking theorems regarding singularities within the framework of general relativity, and made the theoretical prediction that black holes should emit radiation presently known as Hawking radiation. He has also works on popular science in which he discusses his own theories and cosmology in general. The present bibliography lists his important books and papers.
