The Human Herpesviruses An Interdisciplinary Perspective:

The Human Herpesviruses, an Interdisciplinary Perspective André J. Nahmias, Walter R. Dowdle, Raymond F. Schinazi, 1981-01-01 **Immunobiology and Prophylaxis of Human Herpesvirus Infections** Carlos Lopez, Ryoichi Mori, Bernard Roizman, Richard J. Whitley, 2012-12-06 No one whose opinion deserves a moment's consideration can doubt that most of the great positive evils of the world are in themselves removable and will if human affairs continue to improve be in the end reduced to narrow limits J S Mill Utilitarianism II 1863 Mill was not writing about herpesviruses but had he known them as we do he would have included them among the great positive evils of the world They cause disease and premature death and are very costly to our society There is no loftier aim than to cure or prevent human infections with these viruses The objective of much of the current research on herpesviruses is directed toward an understanding of the molecular mechanisms involved in initiation of infection establishment and termination of latent state virus multiplication and the destruction of cells which ultimately is the basis of the diseases caused by these viruses At no time during the past 80 years since members of the herpesvirus family were first discovered has there been so much progress in our understanding of the biology of these viruses as in the past few years Along with the development of a greater understanding of the molecular biology of the well known herpesviruses we have witnessed the isolation of new human herpes viruses **Targets for the Design of Antiviral Agents** Erik De Clercq, 2013-06-29 This publication contains the Review Lectures presented at a joint NATO Advanced Study Institute and FEES Advanced Study Course held at Les Arcs Bourg Saint Maurice France from the 19th June 2nd July 1983 The Course entitled Targets for the Design of Antiviral Agents was in some ways a sequel to the NATO FEES Course held at SOGESTA near Urbino Italy from the 7th 18th May 1979 and published as volume A26 in this series During the subsequent four years we have witnessed the first of the new generation of antiviral compounds which are more efficacious and less toxic than the classical antiviral drugs reach the clinic and we felt that it was the right time to assess the future prospects of this very important and exciting field The vast majority of the drugs developed recently have proved active against various members of the herpesvirus family and elsewhere in this publication we learn that the cure for only rather few viral diseases such as the common cold influenza and herpes promises the return on investment required by the pharmaceutical industry However the aim of this Course was for eminent virologists to identify possible targets among the various virus classes against which the chemists could then design suitable therapeutic agents Recent advances with antiherpesvirus drugs have shown that a far greater selectivity and therapeutic index can be obtained than was previously thought to be possible **The Human Herpesviruses** Bernard Roizman, Richard J. Whitley, Carlos Lopez, 1993
Immunology of Sexually Transmitted Diseases D.J. Wright, 2012-12-06 Twelve contributions present clinicians and pathologists with current immunological developments on the subject Space has also been devoted to drug allergy relevant to treatment of STD and to discussion of the roles of clinician and pathologist in future research Annotation copyright Book

News Inc **Viral Infections of Humans** Alfred S. Evans, 2013-11-11 also occurs New outbreaks of yellow fever have occurred in Colombia and Trinidad and new outbreaks of rift valley fever have occurred in Egypt Chapter 6 Arenaviruses The biochemical and physical properties have now been clarified and they show a remarkable uniformity in the various viruses constituting the group The possibility that prenatal infection with LCM may result in hydrocephalus and chorioretinitis has been raised Serologic surveys have suggested the existence of Lassa virus infection in Guinea Central African Empire Mali Senegal Cameroon and Benin in addition to earlier identification in Nigeria Liberia and Sierra Leone Chapter 7 Coronaviruses New studies have confirmed the important role of these viruses in common respiratory illnesses of children and adults The viruses are now known to contain a single positive strand of RNA About 50% of corona virus infections result in clinical illness About 5% of common colds are caused by strain DC 43 in winter Chapter 8 Cytomegalovirus Sections on pathogenesis of CMV in relation to organ transplantation and mononucleosis as well as sections on the risk and features of congenital infection and disease have been expanded There are encouraging preliminary results with a live CMV vaccine but the questions of viral persistence and oncogenicity require further evaluation *The Herpesviruses* Bernard Roizman, 1985-01-31 A great truth is a truth whose opposite is also a great truth Thomas Mann Essay on Freud 1937 This volume centers on pseudorabies PR V herpes simplex viruses 1 and 2 HSV 1 and HSV 2 and human cytomegalovirus CMV and fulfills three objectives The chapters on the epidemiology and latency of HSV and on the glycoproteins specified by HSV and CMV set the stage for the discussions of the immunobiology and pathogenesis of human herpesvirus infections in Volume 4 The epidemiology of HSV is the basis of our understanding of the spread and survival of this virus in the human populations Central to the epidemiology of HSV and its pathogenesis in humans is the ability of the virus to remain in a latent state for the life of its host The viral membrane glycoproteins are among the most interesting virion proteins primarily because of their critical role in the initiation of infection Since they are the surface membrane proteins of the virion and appear on the surface of productively infected cells they are also the obvious if not the exclusive targets of the immune response The chapters on the transforming potential of HSV and CMV and on the role of HSV in human cancer deal with challenging problems requiring rather different experimental tools **IMMUNOBIOLOGY OF HERPES SIMPLEX VIRUS INFECTION** Rouse, Lopez, 1984-02-14 **Textbook of Human Virology** Robert B. Belshe, 1984 An updated volume focusing on human virology and incorporating knowledge that has been gained in recent years including contemporary information on the molecular biology of viruses *Human Herpesvirus Infections* Carlos Lopez, Bernard Roizman, 1986 **CMV, Pathogenesis and Prevention of Human Infection** Stanley A. Plotkin, 1984 **Fields Virology** Bernard N. Fields, David Mahan Knipe, Peter M. Howley, 1996 **Index of Conference Proceedings Received** British Library. Lending Division, 1981 Natural Hist of Varicellazoster Virus Richard W. Hyman, 1987-05-31 *Tropical Infectious Diseases*, 1999 **Gene Therapy Technologies, Applications and Regulations** Anthony Meager, 1999 This text brings together the

current data previously separated It combines information on gene therapy technologies and the attendant regulatory requirements for gene therapy products and procedures Annals of Saudi Medicine ,1989 **Parasites, Their World and Ours** ,1982 **Subject Catalog** Library of Congress,1982 Anti-infective Therapy Gerald L. Mandell,Robert Gordon Douglas,John Eugene Bennett,1985 This book presents an authoritative multi referenced treatment of all licensed USA antibiotics antifungals and antivirals including discussions of all drugs expected to be licensed in the near future
