Feudalism is one of the most studied topics in the field of history but without a consensus on its central characteristics it remains a slippery concept The History of Chinese Feudal Society provides a comprehensive analysis on the rise and fall of feudalism in China Drawing on a vast library of archival materials it is the first study to investigate feudalism in China from the perspective of sociology and to compare feudalism in China to feudalism in the West The author proposes that landownership and the relationship between landowners and farmers are the two determining factors of feudalism with the Yin Dynasty marking a transitional stage to feudalism and the Zhou Dynasty witnessing the establishment of feudalism as a political system and central institution This book was written by one of the best known Chinese historians and has been a classic best seller for decades Students and scholars of Chinese history especially Chinese feudalism will find it to be an essential reference in their study and research    **Class Conflict and the Crisis of Feudalism** Rodney Hilton,1985-07-01

The conflict between landlords and peasants over the appropriation of the surplus product of the peasant holding was a prime mover in the evolution of medieval society In this collection of essays Rodney Hilton looks at the economic context within which these conflicts took place He seeks to explain the considerable variations in the size composition and management of landed estates and investigates the nature of medieval urbanisation a consequence of the development of both local commodity production and long distance trade in luxury goods By setting the broader economic context the nature of the peasant and landlord economies and the commercialisation of peasant production Hilton s essays enable a thorough understanding of the relationship between landlords and peasants in medieval society    *A Short History of Feudalism in Scotland* Hugh B.
