Kamen, 1981 **The Birth of the Hospital in the Byzantine Empire** Timothy S. Miller, 1985 Medical historians have traditionally claimed that modern hospitals emerged during the latter half of the nineteenth century Premodern hospitals according to many scholars existed mainly as refuges for the desperately poor and sick providing patients with little or no medical care Challenging this view in a compelling survey of hospitals in the East Roman Empire Timothy Miller traces the birth and development of Byzantine xenones or hospitals from their emergence in the fourth century to their decline in the fifteenth century just prior to the Turkish conquest of Constantinople These sophisticated medical facilities he concludes are the true ancestors of modern hospitals In a new introduction to this paperback edition Miller describes the growing scholarship on this subject in recent years The History of the Health Care Sciences and Health Care, 1700-1980 Jonathon

Rise of the Modern Hospital Jeanne Kisacky, 2017-12-02 *Rise of the Modern Hospital* is a focused examination of hospital design in the United States from the 1870s through the 1940s This understudied period witnessed profound changes in hospitals as they shifted from last charitable resorts for the sick poor to premier locations of cutting edge medical treatment for all classes and from low rise decentralized facilities to high rise centralized structures Jeanne Kisacky reveals the changing role of the hospital within the city the competing claims of doctors and architects for expertise in hospital design and the influence of new medical theories and practices on established traditions She traces the dilemma designers faced between creating an environment that could

function as a therapy in and of itself and an environment that was essentially a tool for the facilitation of increasingly technologically assisted medical procedures Heavily illustrated with floor plans drawings and photographs this book considers the hospital building as both a cultural artifact revelatory of external medical and social change and a cultural determinant actively shaping what could and did take place within hospitals **The Architect and the Pavilion Hospital** Jeremy Reginald Buckley Taylor,1997 Organized from an architect centred rather than a building centred perspective this work looks at the powerful and recognizable by product of health building in the Victorian and Edwardian eras the pavilion plan hospital As a design format it proved enduring with a longevity and influence that stretched from the late 1850s to the 1930s **The Yearbook of the Scientific and Learned Societies of Great Britain and Ireland** ,1885
