In this history of new media technologies, leading media and cultural theorists examine new media against the background of traditional media such as film, photography, and print in order to evaluate the multiple claims made about the benefits and freedom of digital media. *Regarding Television* E. Ann Kaplan, 1983. **Television Style** Jeremy G. Butler, 2010-04-05. Style matters. Television relies on style: setting, lighting, videography, editing, and so on, to set moods, hail viewers, construct meanings, build narratives, sell products, and shape information. Yet to date, style has been the most understudied aspect of the medium. In this book, Jeremy G. Butler examines the meanings behind television's stylistic conventions. *Television Style* dissects how style signifies and what significance it has had in specific television contexts. Using hundreds of frame captures from television programs, *Television Style* dares to look closely at television: Miami Vice, ER, soap operas, sitcoms, and commercials. Among other prototypical television texts are deconstructed in an attempt to understand how style functions in television. *Television Style* also assays the state of style during an era of media convergence and the ostensible demise of network television. This book is a much needed introduction to television style and essential reading at a moment when the medium is undergoing radical transformation, perhaps even a stylistic renaissance. *Rocking Around the Clock* E. Ann Kaplan, 2016-04-14. The first non-stop rock video channel was launched in the US in 1981. As a unique popular culture form, MTV warrants attention, and in this, the first study of the medium, originally published in 1987, Ann Kaplan examines the cultural context of MTV and its relationship to the history of rock music. The first part of the book focuses on MTV as a commercial institution, on the contexts of production and exhibition of videos, on their similarity to ads, and on the different perspectives of directors and viewers. Does the adoption of adolescent styles and iconography signal an open-minded acceptance of youth's subversive stances, or does it rather suggest a cynicism by which profit has become the only value? In the second part of the book, Kaplan turns to the rock videos themselves, and from the mass of material that flows through MTV, she identifies five distinct types of video: the romantic, the socially conscious, the nihilistic, the classical, and the postmodern. There are detailed analyses of certain videos, and Kaplan focuses particularly on gender issues in videos by both male and female stars. The final chapter explores the wider implications of MTV. What does the channel tell us about the state of youth culture at the time? *Television in Black-and-white America* Alan Nadel, 2005. La couverture indique: Alan Nadel's new book reminds us that most of the images on early TV were decidedly Caucasian and directed at predominantly white audiences. Television did not invent whiteness for America, but it did reinforce it as the norm, particularly during the Cold War years. Nadel now shows just how instrumental it was in constructing a narrow, conservative, and very white vision of

America During this era prime time TV was dominated by adult Westerns with heroes like The Rebel s Johnny Yuma reincarnating Southern values and Bonanza s Cartwright family reinforcing the notion of white patriarchy programs that Nadel shows bristled with Cold War messages even as they spoke to the nation s mythology America had become visually reconfigured as a vast Ponderosa crisscrossed by concrete highways designed to carry suburban white drivers beyond the moral challenge of racism racial poverty and increasingly vocal civil rights demands Mediamerica, Mediaworld Edward Jay Whetmore,1993 BFI Film and Television Handbook ,1995 Paperbound Books in Print ,1991 **Television** ,1959 English Journal ,1957 General Catalogue University of California, Los Angeles,1973 **Contrast** ,1966 Undead TV Elana Levine,Lisa Parks,2007-11-02 Critical studies of the popular television show BUFFY THE VAMPIRE SLAYER Young People, Soap Operas and Reality Tv Cecilia von Feilitzen,2004 *Re-viewing Television History* Helen Wheatley,2007-10-24 Written by leading scholars in the field this book is an internationally relevant cutting edge reassessment of both current methods and practices in television historiography and of assumptions about television history itself The book focuses on debates about the canon on institutions texts and audiences and the interconnections between these distinct areas Through discussions and case studies it covers a wide selection from television s approaches to immigration and natural history to economic histories of television the framing of television aesthetics and problems in constructing a television canon Each section opens with the editor s overview of the historical research and an appendix details the main research resources for television historians in the UK
