Entertainment and Television Documentary Vincent Campbell, 2016-05-13 The shift from traditional documentary to factual entertainment television has been the subject of much debate and criticism particularly with regard to the representation of science. New types of factual programming that combine documentary techniques with those of entertainment formats such as drama game shows and reality TV have come in for strident criticism. Often featuring spectacular visual effects produced by Computer Generated Imagery these programmes blur the boundaries between mainstream science and popular beliefs. Through close analysis of programmes across a range of sciences this book explores these issues to see if criticisms of such hybrid programmes as representing the rotting carcass of science TV really are valid. Campbell considers if in fact when considered in relation to the principles, practices and communication strategies of different sciences these shows can be seen to offer more complex and rich representations that construct sciences as objects of wonder, awe and the sublime **The world of wonders: a record of things wonderful in nature, science and art.**

Small** John Small, 1876 *Loss and Wonder at the World's End* Laura A. Ogden, 2021-09-13 In *Loss and Wonder at the World's End* Laura A. Ogden brings together animals, people and things from beavers to stolen photographs, lichen, American explorers and birdsong to catalog the ways environmental change and colonial history are entangled in the Fuegian Archipelago of southernmost Chile and Argentina. Repeated algal blooms have closed fisheries in the archipelago. Glaciers are in retreat. Extractive industries such as commercial forestry, natural gas production and salmon farming, along with the introduction of nonnative species, are rapidly transforming assemblages of life. Ogden's archive forms of loss including territory, language, sovereignty and life itself as well as forms of wonder or moments when life continues to flourish even in the ruins of these devastations. Her account draws on long term ethnographic research with settler and Indigenous communities, archival photographs, explorer journals and experiments in natural history and performance studies. *Loss and Wonder at the World's End* frames environmental change as imperialism's shadow, a darkness cast over the earth in the wake of other losses **Peter Parsley's Wonders of the earth, sea, and sky. Kidwell, Stefan Skrimshire, 2024-01-02 Human caused extinctions have never been so prominent in our political and cultural landscape

Extinction and Religion is a collection of wide ranging chapters that explore the implications for religious faith and experience as it relates to a sixth mass extinction in Earth's history. Further, it seeks to answer the question as to how religious and spiritual practices are shaping responses to the crisis. Edited by Jeremy H. Kidwell and Stefan Skrimshire, this collection aims to set a new postsecular agenda articulating the questions, challenges, and ways forward for thinking about religion in an age of mass extinction rather than provide responses from world religions in isolation. It covers subjects such as the multitude of challenges posed by mass extinction to beliefs about the future of humanity, death and the afterlife, the integrity of creation and the relationship between human and nonhuman life. Wide ranging and incisive, *Extinction and Religion* amply demonstrates the many ways in which the threat of extinction profoundly affects our faith and religious life worlds.

Ghosts Behind Glass Dolly Jørgensen, 2025-11-28 How museums display extinct species and what these exhibits say about us. While it's no longer possible to encounter a dodo in the wild, we can still come face to face with them in museums. The remains of extinct species, whether taxidermied, skeletal, drawn or sculpted, stare back at us from display cases. In this moving meditation on what's lost and what endures, environmental historian Dolly Jørgensen visits natural history collections worldwide, from Shanghai to Philadelphia, from Edinburgh to Hobart, Australia, to understand the many ways that museums tell stories about extinction. She encounters extinct animals that are framed as cultural artifacts and as rare valuables that are memorialized with lists and that are brought to life through augmented reality. She draws our attention to creatures with prominent afterlives: passenger pigeons, giant moas, thylacines, as well as those that are less likely to be discussed or displayed. Throughout, Jørgensen examines the relationship between museums and the natural world, so readers can look more closely at exhibits about extinction, studying the displays for what is there as well as what is missing. During a period of rapid species loss driven by humanity's environmental impact, *Ghosts Behind Glass* asks what we can learn about our world from the presence of the extinct.
