Northeastern United States Water Supply Study United States. Army. Corps of Engineers. North Atlantic Division,1977 **River** Leslie Day,2025-11-15 Leslie Day s life changed forever when in 1975 she moved to a tiny houseboat on the Hudson River at the 79th Street Boat Basin a new home umbilically tied to Manhattan s Upper West Side In her heartfelt memoir River Day reveals how she fell in love with and married her neighbor a biology professor at Brooklyn College became a naturalist educator and author and raised her son on the boat As Day invites readers into the intimate and connective stories of the singular floating community on the river the histories and the people of the Hudson flow along with the tides and currents of Day s life There are stories of those who polluted the river and of those who fought for it to be clean and safe stories of how Day became a student and teacher of the river and of the plants and animals she grew to know and love Challenges and celebrations have their own place too storms sinkings fires and ice fields as well as weddings birthdays holidays and found families A unique look at life on and of the Hudson River is a love letter to New York City its famous waterway and the environment around us and the people who shape it

Unlikely Environmentalists Paul Charles Milazzo,2006 Reveals how boosters bureaucrats and engineers not grassroots protesters were truly the ones responsible for spearheading the passage of the Clean Water Act of 1972 How these unlikely protagonists helped to pass the era s most far reaching regulatory law gives us rare insight into how Congress was able to take the lead in addressing those concerns namely in the form of water quality issues

Running Silver John Waldman,2013-10-15 That one could walk drishod on the backs of schools of salmon shad and other fishes moving up Atlantic coast rivers was a not uncommon kind of description of their migratory runs during early Colonial times Accounts tell of awe

inspiring numbers of spawners pushing their way upriver the waters running silver to complete life cycles that once replenished critical marine fisheries along the Eastern Seaboard This is a hugely important fascinating and unique look at the fish of North America whose history and life cycles and conservation challenges are poorly understood Despite these primordial abundances over the centuries these stocks were so stressed that virtually all are now severely depressed with many biologically or commercially extinct and some simply forgotten Running Silver will tell the story of the past present and future of these sea river fish This important book will elevate public consciousness of the contrasts between the historical and the present to show the enormous legacy that has already been lost and to help inspire efforts to save what remains Drawing on the author s thirty year career as a scientist and educator with a passion for the native river fish of the North East Running Silver tells the story of these endangered fish with a mix of research historical accounts anecdotes personal experience interviews and images *Catalog of the Library of the Academy of Natural Sciences of Philadelphia* Academy of Natural Sciences of Philadelphia.
