The Mega Fact:

The Realm of Facts Nicholas Rescher, 2020-01-20 Knowledge of facts is essential for the management of life. Most studies of the subject examine how we go about trying to obtain it; they describe the processes and proceedings of rational inquiry. The present work steps back from this to inquire into the limits and limitations of such processes and to identify the assets and the limitabilities of what they are able to supply for us. It examines how knowledge of facts is secured and consolidated as such and what the resulting information can and cannot provide. It argues that the unavoidable incompleteness of our factual information also endows it with an element of incorrectness. By looking also at the negative side of human inquiry, the book's perspective clarifies the nature of our grip on the facts that constitute our view of the reality of things.

3000 Facts about Video Games James Egan, 2016-10-16 There is a version of The Legend of Zelda where every character is Nicholas Cage. Donkey Kong started off as a Popeye game. The combos in Street Fighter II were created by accident. The combat system in Batman Arkham Asylum was supposed to resemble Guitar Hero. When the trailer of Crash Bandicoot was first revealed, some people thought it looked so good the demo was fake. The lead character of Cuphead was nearly a unicycle. Destiny cost 500 million. Halo was originally called Blam. Nintendo was created in 1889. Mortal Kombat was only made by four people. Final Fantasy was meant to be called Fighting Fantasy. There's a version of Grand Theft Auto V where meteors keep smashing into the city. The blocks in Tetris are called Tetriminos. Sonic appeared in two games before Sonic the Hedgehog. There were not supposed to be any people in The Sims.

Understanding Reality Nicholas Rescher, 2018-08-15 The book seeks to show that the present discussion so unfolds as to show that ultimately Reality's inherent impetus to lawful order serves also to account for its existence. The ultimate explanation of its order is as something that also provides for its reason for being. Step by step a train of thought unfolds to indicate that Reality both exists and has the nature it does for good reason and specifically because this is somehow for the best. Such an approach goes back to the Platonism of classical antiquity. Many difficulties lie in the way of its acceptance. But is it in the final analysis the theory that works here takes the form of a Neo-Platonism of sorts. Or if reality has any rational explanation at all, it is one that will have to proceed along these lines based upon rationality itself. An underlying theme that runs throughout the present elaboration of metaphysics is the dialectic of interaction between descriptive facts on the one hand and normative ideals on the other. On such a view, it is a salient factor in metaphysics that reality as such is descriptively constituted as a potentially perfect system of knowledge even though we imperfect beings cannot get a more than an imperfectly secure cognitive grip on it. Accordingly, we can never hope to surmount the contrast between The metaphysical ideal of a perfected system of knowledge, The imperfect realization of actuality that we can ever hope to achieve in practice.
