The If Chronicles:

History, Literature and Theology in the Book of Chronicles Ehud Ben Zvi, 2014-12-05 History Literature and Theology in the Book of Chronicles presents a new way of approaching this key biblical text arguing that the Book employs both multiple viewpoints and the knowledge of the past held by its intended readership to reshape social memory and reinforce the authority of God The Book of Chronicles communicates to its intended readership a theological worldview built around multiple partial perspectives which inform and balance each other This is a worldview which emphasizes the limitations of all human knowledge even of theologically proper knowledge When Chronicles presents the past as explainable it also affirms that those who inhabited it could not predict the future And despite expanding an explainable past the Book deliberately frames some of YHWH's actions crucial events in Israel's social memory as unexplainable in human terms The Book serves to rationalise divinely ordained prescriptive behaviour through its emphasis on the impossibility of adequate human understanding of a past present and future governed by YHWH
