### ABSTRACT

Access to relevant and accurate information is at the heart of tourism, more so in this era of the Internet information overload has become a prevalent phenomenon and as such a serious issue for those seeking for appropriate information. Furthermore, various researches have been carried out on how to make information on tourism website more effective. Intelligent tourism information system tries to bridge the gap by noting what a tourist perceives as relevant, in terms of content pertaining to tourism products in tourism websites. Hence, the aim of this research entails the implementation of an intelligent platform that will assist tourists in gaining access to information on tourist locations in Nigeria. In view of the foregoing, the system was implemented using Rational Unified Process as the adopted software development process, whereas MySQL, HTML and PHP were the implementation tools used in the development of the system. It was also able to act intelligently by using hybrid recommendation technique to recommend tourist locations based on their preference.

### 1. INTRODUCTION

In the new era of information technology, information overload has become a serious problem to those seeking for information online. Manhua Yang, 2022 relate that a tourist needs enough information about the country he wishes to travel. Some specific data required include hotels, destinations, malls, and tourist places, and they are needed before they land on the tourist country. Recently, intelligent search has been employed in the web that suggest that these problems can be partially overcome by providing search engines with more intelligence and with the user's underlying knowledge. (Anastasia, 2017). Such include google.com and another class of intelligent system that has proven relevant in addressing the issue of information overload is the recommender system (Daramola, 2009). In the aspect of tourism, Internet and web technologies has made information on tourist accommodations, transportation, shopping, food, festivals, and attractions to be more readily available.
