Chase,Diane Z. Chase,2024-05-07 Establishing ancient population numbers and determining how they were distributed across a landscape over time constitute two of the most pressing problems in archaeology Accurate population data is crucial for modeling interpreting and understanding the past Now advances in both archaeology and technology have changed the way that such approximations can be achieved Including research from both highland central Mexico and the tropical lowlands of the Maya and Olmec areas this book reexamines the demography in ancient Mesoamerica Contributors present methods for determining population estimates field methods for settlement pattern studies to obtain demographic data and new technologies such as LiDAR light detecting and ranging that have expanded views of the ground in forested areas Contributions to this book provide a view of ancient landscape use and modification that was not possible in the twentieth century This important new work provides new understandings of Mesoamerican urbanism development and changes over time Contributors Traci Ardren M Charlotte Arnauld B Rbara Arroyo Luke Auld Thomas Marcello A Canuto Adrian S Z Chase Arlen F Chase Diane Z Chase Elyse D Z Chase Javier Estrada Gary M Feinman L J Gorenflo Julien Hiquet Scott R Hutson Gerardo Jiménez Delgado Eva Lemonnier Rodrigo Liendo Stuardo Jos Lobo Javier Lpez Mejía Michael L Loughlin Deborah L Nichols Christopher A Pool Ian G Robertson Jeremy A Sabloff Travis W Stanton *In Search of Maya Sea Traders* Heather Irene McKillop,2005 Stone temples rising above the rainforest canopy and elaborate hieroglyphs carved onto stone

monuments give silent testimony to the high culture of the Maya ancestors of the indigenous peoples of Central America They have inspired generations of archaeologists professional and avocational to take to the field in search of the past One such archaeologist is Heather McKillop who in 1979 first visited the coast of Belize in search of a little known aspect of ancient Maya life the sea trade that helped move salt obsidian coral and other goods around the interior of the empire In

1982 she began bringing volunteers and students to the islands off the coast of Port Honduras Belize Since then she has returned many times to excavate sites that reveal the scope and diversity of the trade that passed by water throughout the Maya world In this book McKillop tells the story of the search for the Maya sea traders as well as the story of the traders themselves as it emerges from the excavations In Search of Maya Sea Traders describes the trading port of Wild Cane Cay where exotic obsidian jade gold and other goods including highly crafted pots were traded from distant lands McKillop also tells us about the more coastal inland trade of salt seafood and other marine resources Through the story of her own work and that of her students and volunteers McKillop models both the research design and the field work that are required to interpret the civilizations of the past She includes the adventure of discovery the challenges of working in wild environments from snakes and rising sea levels to falling coconuts and the tedium of daily measured digs in a near tropical setting Through her experiences the reader also gets to know some of the local residents of Port Honduras and Wild Cane Cay descendants of the ancient Maya In Search of Maya Sea Traders will appeal to that part of each of us that longs to explore distant places and cultures in quest of a seldom glimpsed past
