**and Composites** Domenico Acierno, Alberto D'Amore, Luigi Grassia, 2008-09-05 The International Conference on Times of Polymers TOP and Composites was held in September 2008 Ischia Italy. This was the fourth of a series of biennial work shops on polymers timescales resulting from a joint initiative of the Second University of Naples SUN and the University of Naples Federico II. Scientists from chemistry to physics to engineering areas formed a homogeneous community as the contributions even if spanning very different topics subtend the concept of timescale of polymer based materials. In all about 150 papers were submitted by scientists from all over the world. The conference is organised in oral sessions subdivided into three main general topics namely Timescales of Polymers TP Composites and Nano Composites Polymer Chemistry and Physics which included the following sub topics Viscoelasticity Glassy State Thin Films Blends Organic Electronics OLED OTFT Polymer based Sensors Industrial Rheology Durability Degradation Polymer Processing Tissue Engineering Foams Biomaterials Cultural Heritage Fracture and Yielding Properties Modelling. This book is organized in a way that the sequence of papers complies with the structure of the conference with many papers selected from the general poster session. The first part of the book spanned over the timescales of polymers in absence of chemistry driven phenomena. The time dependent behaviour of several classes of polymers was tackled from different perspectives from soft matter physics to structural design approach. The second section was mainly devoted to the different aspects that influence the response properties of Nanocomposites as well as structural composites. Many papers focused on the promising perspectives of carbon nanotubes organically modified clays and metallic nanoparticles based polymers. Theoretical as well as experimental approaches were extensively addressed. The third section was devoted to the chemistry induced physical changes in polymers. From optical properties to

biocompatibility a wide range of systems was presented The book is co edited by Alberto D Amore and Domenico Acierno the co chairmen of the conference that pre screened the submitted papers for topical applicability and by Luigi Grassia that with his invaluable support rendered realistic carrying out the book within a very narrow timescale Revue des questions scientifiques ,1988 The Mar and May numbers of v 97 1930 combined in one issue compromise a special series of articles on the Belgian Congo Le Congo Belge et les sciences published on the occasion of the centenary of Belgian independence A separate map Carte administrative du Congo Belge et de ses voies de communication accompanies this combined issue and is designed as suppl ment la Revue des questions scientifique mars mai 1930 *Advanced Polymers Abstracts* ,1996
