Tulub, Nikolaï Nikolaevich Bogoliŭbov, Yu.V. Novozhilov, Functional Methods in Quantum Field Theory and Statistical Physics A.N. Vasiliev, 1998-07-28 Providing a systematic introduction to the techniques which are fundamental to quantum field theory this book pays special attention to the use of these techniques in a wide variety of areas including ordinary quantum mechanics quantum mechanics in the second quantized formulation relativistic quantum field theory Euclidean field theory quantum statistics at finite temperature and the classical statistics of nonideal gas and spin systems The extended chapter on variational methods and functional Legendre transformations contains completely original material Functional Integrals in Quantum Field Theory and Statistical Physics V.N. Popov, 2001-11-30 Functional integration is one of the most powerful methods of contemporary theoretical physics enabling us to simplify accelerate and make clearer the process of the theoretician's analytical work Interest in this method and the endeavour to master it creatively grows incessantly This book presents a study of the application of functional integration methods to a wide range of contemporary theoretical physics problems The concept of a functional integral is introduced as a method of quantizing finite dimensional mechanical systems as an alternative to ordinary quantum mechanics The problems of systems quantization with constraints and the manifolds quantization are presented here for the first time in a monograph The application of the functional integration methods to systems with an infinite number of degrees of freedom allows one to uniquely introduce and formulate the diagram perturbation theory in quantum field theory and statistical physics This approach is significantly simpler than the widely accepted method using an operator approach **Nuclear Science Abstracts** ,1970 **Field Theory: Functional formulation of S-matrix theory** Jan Rzewuski, 1958 **Advances in Physical Sciences** ,1957 **The Method of Functionals in the Quantum Theory of Fields by Yu.
