The Mind Of An Ape:

The Mind of an Ape David Premack, Ann J. Premack, 1983-01-01 **The Relations of Mind and Brain** Henry Calderwood, 1879 The relations of mind and brain Henry CALDERWOOD (L.L.D., F.R.S.E.), 1879 An Ape Ethic and the Question of Personhood Gregory F. Tague, 2020-03-05 Gregory F Tague s An Ape Ethic and the Question of Personhood argues that great apes are moral individuals because they engage in a land ethic as ecosystem engineers to generate ecologically sustainable biomes for themselves and other species Tague shows that we need to recognize apes as eco engineers in order to save them and their habitats and that in so doing we will ultimately save earth s biosphere The book draws on extensive empirical research from the ecology and behavior of great apes and synthesizes past and current understanding of the similarities in cognition social behavior and culture found in apes Importantly this book proposes that differences between humans and apes provide the foundation for the call to recognize forest personhood in the great apes While all ape species are alike in terms of cognition intelligence and behaviors there is a vital contrast unlike humans great apes are efficient ecological engineers Therefore simian forest sovereignty is critical to conservation efforts in controlling global warming and apes should be granted dominion over their tropical forests Weaving together philosophy biology socioecology and elements from eco psychology this book provides a glimmer of hope for future acknowledgment of the inherent ethic that ape species embody in their eco centered existence on this planet **A Brief History of the Mind** William H. Calvin, 2004 Traces the evolution of the mind from apes Neanderthals and human ancestors to a burst of creativity that began about fifty thousand years ago suggesting that the mind will continue to evolve with enhanced reasoning abilities ethics and other changes **The Mind of the Child: The development of the intellect** William T. at symbolic levels traditionally considered to be uniquely human Here the mechanisms involved in building these abilities especially the lengthy developmental and enculturation processes are emphasized showing how new discoveries are changing views on how primates and human intelligence evolved This book is for anyone interested in current research and theoretical views of great ape cognition **The brain from ape to man; a contribution to the study of the** Frederick Tilney,1928 *The Dynamic Theory of Life and Mind* James Bradun Alexander,1893 **Phenomenology of Life - From the Animal Soul to the Human Mind** Anna-Teresa Tymieniecka,2007-08-23 Transcendental phenomenology presumed to have overcome the classic mind body dichotomy in terms of consciousness yet according to progress in scientific studies the biological functions of the brain seem to appropriate significant functions attributed traditionally to consciousness Should we indeed dissolve the specificity of human consciousness by explaining human experience in its multiple sense giving modalities through the physiological functions of the brain The present collection of studies addresses this crucial question challenging such naturalizing reductionism from multiple angles In search for the roots of The Specifically Human Experience Bombala moving along the line of Animality and Intellection Gosetti Ferencei Naturalistic Attitude and Personalistic Attitude Villela Petit and numerous other perspectives we arrive at a novel proposal to explain the scholar functional differentiation of conscious modalities We reach their source in the ontopoietic thread conducting the Logos of Life in its stepwise Evolutive Unfolding Carmen Cozma and in sentience as its quintessential core of further irreducible continuity Tymieniecka dispelling dichotomies and reductionisms *The Brain from Ape to Man* Frederick Tilney, Henry Alsop Riley,1928 This work is a classic study of the evolution of the central nervous system in the higher mammals
