The Mind Of Modern Russia:

The Mind of Modern Russia Hans Kohn,1961 **The Mind of Modern Russia** Hans Kohn,1955 *The Mind of Modern Russia* Hans Kohn,1957 **The Mind of Modern Russia** Hans Kohn,1962 **The New Russian Business Leaders** Manfred F. R. Kets de Vries,Stanislav V. Shekshnia,Konstantin Korotov,Elizabeth Florent-Treacy,2005-01-01 As a study of Russian business leadership the depth of research and cogency of argument in the book is well ahead of anything else seen to date and to that end it deserves to be highly regarded The Delta Intercultural Academy This book is obligatory reading for those planning to do business in Russia or wishing to understand how business is conducted The New Russian Business Leaders is written by a distinguished group of international management specialists including two Russians Using models and case studies of leading Russian companies and entrepreneurs the authors draw conclusions about Russia s evolving business climate the requirements for entrepreneurial success and the value of international business education for Russia s business leaders Paul Gregory Slavonic and East European Review This highly talented multinational team has produced a rich and meaningful contribution to the literature on Russian business These authors know the very essence of Russia from their extensive academic and practitioner experience They deliver fascinating original in depth case studies of the pioneering men and women business leaders of modern Russia s first capitalist decade They also interpret the cases in the context of Russia s history and culture and offer a comprehensive framework for how Russian business and leadership could evolve to build the country s economy The New Russian Business Leaders will surely serve for years to come as an authoritative source for academics and practitioners seeking to understand the underlying dynamics of Russian business and its leaders Sheila M Puffer Northeastern University Boston US In order to work effectively with Russian organizations it is essential for potential Western partners and shareholders to fully understand their leadership style organizational practices and business expectations Based on extensive interviews with the pioneers of Russian business and the authors own experiences this perceptive new book attempts to decipher the enigma of Russia s new generation of business leaders The authors present six in depth case studies focusing on companies of vastly differing sizes ranging from a newly privatized operation and the creation and organization of an oligarch s empire to several entrepreneurial start ups in different service industries The case studies document the changes and developments that have occurred in Russia since the privatization era of the 1990s highlighting the strengths and weaknesses of the emerging business leadership orientations Grounded in Russian culture and history the book takes a balanced view of the rapid development and transformation of the country s business leadership over the past ten years The authors also offer perceptive conclusions and practical advice that will not only contribute to the success of Western businesses operating in Russia and other former communist countries in Eastern Europe but also help business people in Eastern Europe create high performance organizations As we move towards a globalized economy the need to recognise executive behaviour in Russia is becoming increasingly important This book will

provide a great source of information for academics and researchers of entrepreneurship leadership studies and international business. Although the focus is on Russian entrepreneurs, the lessons in the book are equally as relevant for other cultures and leadership styles.

Technologies for Intuition Alaina Lemon, 2018. Cold War paranoia can only partly describe or explain the 20th century dreams of telepathy. The nightmare shades of mind control and crowd frenzy have long alternated with the pastels of love and collective effervescence. Both extremes materialized over time along tangled circuits of wars, events and interactions staged across borders since at least the 19th century. The Cold War and its fences fed fascination with the workings and the failures of contact and communication. Opposed sides accused each other of jamming media and spinning propaganda even while they mirrored fantasies of connection. This book contrasts and connects Russian and American channels and means to check channels with special attention to intersections of the telepathic with the theatrical. It theorizes links between historically layered struggles over technologies for intuition and dominant models of communication commonsense or theoretical. It demonstrates that theories resting on models of individual sincerity and of dyadic communication warp understandings of the USSR and Russia and thus of the USA as well. It proposes that attention to the means of making and checking contact that is to the phatic functions in language offers a way out of the impasses and paradoxes of paranoia.

The Bank for International Ideas - from Intellectual Capital to Intellectual Property Paula Singleton, Leonard Johnson, 2011-03-06.

How do we connect Good Ideas with the Investment community in Today's Economy on a Global Scale? In this Digital Age of the 21st century, what is now required is a New Economic System, a New Platform that can measure economics and the currency of trading back and forth similar to the barter and trade systems of the past. Intellectual Capital is the New Currency of today. This new form of capital is the current world structure and as we look upon this turning point today in our lives, taking this opportunity to move forward not only individually but collectively as a community and globally as a world order. This new Intellectual Capital is leading us to a New Economic Order. Today we see the world at a strategic inflection point where it is growing as well as advancing in the areas of Intellectual Capital. Of course, there are several known companies like Google, Yahoo, Microsoft, Amazon, eBay and many others. But we must never forget that Intellectual Property is what also created the automobile. It was Henry Ford's Intellectual Capital that brought automation of the automobile, which created the wealth of the auto industry. We then remember the minds of Andrew Carnegie and John D. Rockefeller which created industrialization.

on a level that is still seen today Rockefeller also added oil to his list of contributions and moved forward the car industry The phenomenon of the social network website Facebook is a good analogy Users can post a profile easily and with no barriers The result is over 500 million people have added profiles so far in more than 170 countries This has resulted in an incredible impact of one platform growing by collectivism The financial brilliance of Goldman Sachs has seen this and blessed it with its golden gavel by partnering with Facebook which is now valued at 50 Billion Dollars This valuation is not focus on advertising capability only or any other traditional measurable financial value This value is placed on growth and the number of people in the system as well as the future possibilities to reach these people directly The key is anyone can enter a profile from anyplace in the world because the barrier is so low Facebook is not focused on economic development or global prosperity But The Bank for International Ideas is **The New Russia** Lionel Declé,1906 A History of Russia Alfred Rambaud,1882
