The Mediaeval Face:

The Mediaeval Face Amanda Tomlinson, National Portrait Gallery (Great Britain), 1974 **Faces of Charisma: Image, Text, Object in Byzantium and the Medieval West**, 2018-07-26 In *Faces of Charisma Image Text Object in Byzantium and the Medieval West* a multi disciplinary group of scholars advances the theory that charisma may be a quality of art as well as of person Beginning with the argument that Weberian charisma of person is itself a matter of representation this volume shows that to study charismatic art is to experiment with a theory of representation that allows for the possibility of nothing less than a breakdown between art and viewer and between art and lived experience The volume examines charismatic works of literature visual art and architecture from England Northern Europe Italy Ancient Greece and Constantinople and from time periods ranging from antiquity to the beginning of the early modern period Contributors are Joseph Salvatore Ackley Paul Binski Paroma Chatterjee Andrey Egorov Erik Gustafson Duncan Hardy Stephen Jaeger Jacqueline E Jung Lynsey McCulloch Martino Rossi Monti Gavin Richardson and Andrew Romig *The Face and Faciality in Medieval French Literature, 1170-1390* Alice Hazard, 2021 Modern theoretical approaches throw new light on the concepts of face and faciality in the Roman de la Rose and other French texts from the Middle Ages *A Cultural History of Work in the Medieval Age* Valerie L. Garver, 2020-09-17 Winner of the 2020 PROSE Award for Multivolume Reference Humanities Work was central to medieval life Religious and secular authorities generally expected almost everyone to work Artistic and literary depictions underlined work s cultural value The vast majority of medieval people engaged in agriculture because it was the only way they could obtain food Yet their work led to innovations in technology and production and allowed others to engage in specialized labor helping to drive the growth of cities Many workers moved to seek employment and to improve their living conditions For those who could not work charity was often available and many individuals and institutions provided forms of social welfare Guilds protected their members and created means for the transmission of skills When they were not at work medieval Christians were to meet their religious obligations yet many also enjoyed various pastimes A consideration of medieval work is therefore one of medieval society in all its creativity and complexity and that is precisely what this volume provides *A Cultural History of Work in the Medieval Age* presents an overview of the period with essays on economies representations of work workplaces work cultures technology mobility society politics and leisure **The Face of the Nude** John Brophy, 1968 Written by the renowned author art collector and critic John Brophy this book provides a penetrating comparative study of the nude in Western art and the way artists throughout history have depicted the face in relation to the naked human body In over 23 000 words Mr Brophy explores the ever changing relationship between the nude and the portrayal of faces in each period from the Archaic and Classical epochs through the Renaissance from the Baroque and Rococo periods to the Impressionists the Post Impressionists and beyond From jacket flap **Arts of the Medieval Cathedrals** Kathleen Nolan, Dany Sandron, 2016-12-05 The touchstones of Gothic monumental art in France the abbey

church of Saint Denis and the cathedrals of Chartres Reims and Bourges form the core of this collection dedicated to the memory of Anne Prache The essays reflect the impact of Prache s career both as a scholar of wide ranging interests and as a builder of bridges between the French and American academic communities Thus the authors include scholars in France and the United States both academics and museum professionals while the thematic matrix of the book divided into architecture stained glass and sculpture reflects the multiple media explored by Prache during her long career The essays employ a varied range of methodologies to explore Gothic monuments The chapters in the architectural section include an intensive archeological analysis of the foundations of Reims Cathedral the close reading of a late medieval literary text for a symbolic understanding of Paris and essays that explore the medieval use of practical geometry in designing entire buildings and their components Saint Denis Reims and Chartres all monuments studied by Prache are discussed in the next part on stained glass These chapters demonstrate how old problems can be clarified by new evidence whether from the accessibility of previously unknown archival information for Reims or through revelations that arise from restoration at Chartres These essays also include a study showing the complexity of making attributions for the storied glass of Saint Denis The final set of essays likewise takes different approaches to sculpture whether constructing links to the liturgy at Reims or discussing the meaning of a sculptural ensemble studied by Prache early in her career the cloister of Notre Dame en Vaux in Ch lons en Champagne or scrupulously examining the fa ade sculpture at Bourges Cathedral for insights into the design process As a whole the volume provides a window onto key directions in the study of
