The Microbiologist And Biological Defense Research Ethics Politics And International Security:

The Microbiologist and Biological Defense Research Raymond A. Zilinskas, 1992 *The Microbiologist and Biological Defense Research* Raymond A. Zilinskas, 1992 This volume outlines the issues raised by the military's support of biological defence research presenting divergent views of the psychological historical ethical social legal and scientific aspects of society's attempts to protect itself from biological weapons and warfare. It is the outcome of a conference held April 4-5 1991 and sponsored by the Center for Public Issues in Biotechnology Maryland Biotechnology Institute the Center for the History of Microbiology ASM Archives the University of Maryland Baltimore County and Physicians for Human Rights **Factories of Death** Sheldon H. Chemical Disarmament and International Security Brad Roberts, 1992 *Biological Warfare* Raymond A. Zilinskas, 2000 Recent revelations about Iraqi and Soviet Russian biological weapons programs and highly publicized events such as the deployment of anthrax and botulinum by the Aum Shinrikyo sect in Japan have made clear the necessity for addressing the issues of biological warfare and defense. In a comprehensive analysis of this imminent threat to global security fourteen internationally recognized authorities consider the motivations of governments and terrorist groups seeking to acquire biological weapons managing the consequences of a biological attack techniques for weapons development methods for detection of pathogens and toxins defense against biological weapons and international efforts to counter their proliferation.

Biological Weapons Joshua Lederberg, 1999 foreword by William S. Cohen U.S. Secretary of Defense Biological weapons pose a horrifying and growing threat to the United States and to the world in general. Revelations about Iraq's weapons research and the plans of the Aum Shinrikyo cult in Japan serve as frightening reminders of the potential for military or terrorist use of biological agents. The essays in this book many of which were originally published in the *Journal of the American Medical Association* examine the medical scientific and political dimensions of limiting the threat posed by biological weapons. The contributors consider the current threat posed by biological weapons the history of attempts to control them episodes in which biological agents have been used Iraq's biological warfare program and policies that the United States might pursue to reduce the threat.
