The Middle Eastern States And The Law Of The Sea

**George Galdorisi, Doug Bandow, M.
Casey Jarman**

The Middle Eastern States And The Law Of The Sea:

The Middle Eastern States and the Law of the Sea Ali A. Hakim,1979 **The Middle East** Peter Beaumont,Gerald Blake,J. Malcolm Wagstaff,2016-04-14 This book first published in 1976 and in this second edition in 1988 combines an examination of the political cultural and economic geography of the Middle East with a detailed study of the region s landscape features natural resources environmental conditions and ecological evolution The Middle East with its extremes of climate and terrain has long fascinated those interested in the fine balance between man and his environment and now its economic and political importance in world affairs has brought the region to the attention of everybody **The Middle East and North Africa** Alasdair Drysdale,2024-10-15 This contemporary text the first in over a decade on the region presents the geography of the Middle East and North Africa defined as the Arab World Israel Turkey Iran and Afghanistan Thematically organized the book s eleven chapters focus on the region s physical and climatic setting demographic characteristics migration patterns religious and linguistic diversity political map offshore claims oil and gas resources and subregions and states Within this framework Drysdale emphasizes pressing current problems the impact of climate change in a region where some areas already suffer from extreme summer heat and aridity the challenge of providing additional water in a region where per capita availability of freshwater is already the lowest in the world the impact of high fertility and rapid population growth in a fragile environment where economies are often unable to absorb young workers entering the labor force the looming prospect of an aging population the effects of out and in migration the diverse impact and role of Islam in daily and public life the integrative consequences of linguistic and ethnic diversity the evolution and imperfections of the political map ongoing territorial and boundary disputes that often have global repercussions external dependence on the region s prolific oil and gas resources and the extreme regional inequalities associated with their presence or absence This timely and insightful analysis is essential reading for students of the region who need a better understanding of key regional characteristics challenges and issues

BRISMES Proceedings of the 1986 International Conference on Middle Eastern Studies British Society for Middle Eastern Studies,1986 [The United States and the 1982 Law of the Sea Convention](#) George Galdorisi,Doug Bandow,M. Casey Jarman,1994 [The Law of the Sea and Maritime Boundary Disputes in Areas of Hydrocarbon Potential](#) Vivek Chandra,2023-09-22 The United Nations Convention on the Law of Sea UNCLOS is hailed as one of the most significant multilateral legal agreements executed in the past few decades However its shortcomings are neither trivial nor inconsequential especially regarding maritime boundary disputes involving hydrocarbon resources This monograph examines the relationship between UNCLOS and maritime boundaries in five non polar regions encompassing almost 90% of global unresolved disputes involving offshore hydrocarbon development The regions which include the eastern Mediterranean the Caspian Sea the Persian Gulf northeast Asia and the South China Sea were chosen for their oil and gas resources potential and recent military skirmishes that have the potential to lead to wider regional

confrontations The book addresses each region's maritime boundary status in the context of specific articles within UNCLOS that have been exploited by disputing states to justify their overlapping claims The history and future applicability of multilateral Joint Development Area agreements for each region are evaluated for their potential to provide a cooperative solution to resolve ongoing tensions Highlighting the limitations of current gun boat diplomacy the monograph makes practical suggestions for new paradigms for resolving outstanding disputes promoting lasting peace and generating economic benefits resulting from resource development

Maritime Disputes in the Eastern Mediterranean

Roudi Baroudi,2020-05-31 The ways and means described in this book constitute a road map for responsible members of the international community to work together reduce tensions resolve differences over maritime boundaries peacefully and reap the rewards of a safer stabler and more prosperous world This volume shows that the UN and its associated treaties courts and other institutions have developed a body of laws rules and procedures guiding the way to negotiated peaceful outcomes Mr Baroudi's book also points to rapid advances of science and technology that take much of the guesswork out of boundary delineation making this route more reliable and user friendly than ever before The successful use of these mechanisms would set a useful example for the resolution of boundary disputes in other regions of the world That in turn would restore confidence in the international rules based system and could pave the way for the settling of some of the world's most troubling and dangerous disputes

The Razor's Edge:International Boundaries and Political Geography: Essays in Honour of Professor Gerald Blake

Gerald Henry Blake,2002-11-26 This festschrift by thirty of Blake's colleagues and former students reflects the topics and regional preoccupations Professor Blake has kept returning to throughout his long career especially the Middle East maritime boundaries and the relation between borders and demographics Several of the authors extend his work in such areas as Arctic jurisdiction environmental issues of transboundary water management and geographic information systems GIS
