## **The Mind Incarnate:**

*The Mind Incarnate* Lawrence A. Shapiro, 2004 Examines how the mind is connected to the body by testing two major hypotheses against two competitors and argues that the relationship of mind to body is closer than many philosophers have supposed    **Consciousness and the Mind of God** Charles Taliaferro, 1994-08-25 This work addresses the challenge of contemporary materialism for thinking about God The book examines contemporary theories of consciousness and defends a non materialist theory of persons subjectivity and God A version of dualism is articulated that seeks to avoid the fragmented outlook of most dualist theories Dualism is often considered to be inadequate both philosophically and ethically and is seen as a chief cause of denigrating the body and of promoting individualism and scepticism Charles Taliaferro defends a holistic understanding of the person body relationship in which the two are distinguishable yet integrally related This integrated dualism is spelled out in a way that avoids the ethical and philosophical problems associated with other dualistic accounts especially in its Platonic and Cartesian forms A defence is then made of the intelligibility of thinking about God as non physical yet integrally present to creation Charles Taliaferro is co editor of the forthcoming *A Companion to Philosophy of Religion* with Philip Quinn He has had work published in among others *The Philosophical Quarterly* *Metaphilosophy* *Philosophy and Phenomenological Research* and *Philosophia*    **The Metaphor of God Incarnate** John Hick, 1993-01-01

... **God Incarnate** Hollingworth Tully Kingdon, 1890    **The Matter of the Mind** Maurice Schouten, Huib Looren de Jong, 2012-05-07 The Matter of the Mind addresses and illuminates the relationship between psychology and neuroscience by focusing on the topic of reduction Written by leading philosophers in the field Discusses recent theorizing in the mind brain sciences and reviews and weighs the evidence in favour of reductionism against the backdrop of recent important advances within psychology and the neurosciences Collects the latest work on central topics where neuroscience is now making inroads in traditional psychological terrain such as adaptive behaviour reward systems consciousness and social cognition

Boundaries of the Mind Robert A. Wilson, 2004-06-28 Where does the mind begin and end Most philosophers and cognitive scientists take the view that the mind is bounded by the skull or skin of the individual Robert Wilson in this provocative and challenging new book provides the foundations for the view that the mind extends beyond the boundary of the individual Written with verve and clarity this ambitious book will appeal to a broad swathe of professionals and students in philosophy psychology cognitive science and the history of the behavioral and human sciences    **God Incarnate** Oliver D. Crisp, 2009-08-06 The doctrine of the incarnation is one of the central and defining dogmas of the Christian faith In this text Oliver Crisp builds upon his previous work *Divinity and Humanity The Incarnation Reconsidered* Cambridge 2007 In God Incarnate he explores the Incarnation further and covers issues he did not deal with in his previous book This work attempts to further the project of setting out a coherent account of the Incarnation by considering key facets of this doctrine as parts of a larger integrated doctrinal whole Throughout he is concerned to develop a position in line with historic Christianity that

is catholic and ecumenical in tone in line with the contours of the Reformed theological tradition within which his own work falls And like its predecessor this book will draw upon philosophical and theological resources to make sense of the problems the doctrine faces     Is the Soul Immortal?
