A Study of the Geometry of Infinite Dimensional Spaces with a Bilinear Metric I.U. P. Ginzburg,1964 A Study of the Geometry of Infinite Dimensional Spaces with a Bilinear Metric I[U] P. Ginzburg,1964 **Arthur's Invariant Trace Formula and Comparison of Inner Forms** Yuval Z. Flicker,2016-09-14 This monograph provides an accessible and comprehensive introduction to James Arthur's invariant trace formula, a crucial tool in the theory of automorphic representations. It synthesizes two decades of Arthur's research and writing into one volume, treating a highly detailed and often difficult subject in a clearer and more uniform manner without sacrificing any technical details. The book begins with a brief overview of Arthur's work and a proof of the correspondence between GL_n and its inner forms in general. Subsequent chapters develop the invariant trace formula in a form fit for applications, starting with Arthur's proof of the basic non-invariant trace formula followed by a study of the non-invariance of the terms in the basic trace formula and finally an in-depth look at the development of the invariant formula. The final chapter illustrates the use of the formula by comparing it for G and GL_n and its inner form G and for functions with matching orbital integrals.
